THE HONORABLE J. MILLARD TAWES
Government House
Annapolis, Maryland

Dear Governor Tawes:

In accordance with the provision of the laws of Maryland, I have the honor to present to you herewith the ninety-ninth "annual report covering all operations of the State Department of Education and the support, conditions, progress and needs of education throughout the State" for the period beginning July 1, 1964, and ending June 30, 1965.

Respectfully submitted,

JAMES A. SENSENBAUGH

Secretary-Treasurer
State Board of Education
Baltimore, Maryland

1965 MARYLAND LEGISLATION AFFECTING EDUCATION*

REGULAR SESSION

Advisory Council for Higher Education

Chapter 510, Senate Bill 385, amends Section 325(a) changing the limitation on the qualifications of persons for members on the Advisory Council for Higher Education.

Apprenticeship

Chapter 910, House Bill 1009, relates to the establishment and operation of programs for the training of apprentices and other on-the-job trainees.

Barbers

Chapter 722, House Bill 478, amends Article 43 generally revising the laws relating to the qualifications, registration, and examination of barbers and excluding certain counties from the provisions.

Colleges

Chapter 616, Senate Bill 586, repeals Section 319 eliminating certain exemptions in the law concerning fraudulent or substandard college degrees.

Community Colleges

Chapter 379, House Bill 245, amends Section 304(B) increasing the State's contribution for each full-time student at any community college.

Community Colleges

Chapter 511, Senate Bill 388, adds Section 300(1) authorizing the board of trustees of a community college to permit the use of its facilities in connection wth any program of secondary or vocational education administered by the board of education of the county or Baltimore City.

Community Colleges

Chapter 582, Senate Bill 419, adds Section 33A, amends Sections 301, 303, and 304, permitting the establishment of regional community colleges.

County Superintendent of Schools

Chapter 741, Senate Bill 233, amends Section 148(b) concerning the compensation of county superintendents of schools.

Employees' Retirement System

Chapter 194, Senate Bill 254, amends Section 11(3)(1) of Article 73B correcting the laws as to the computation of pensions payable to members of the system.

Employees' Retirement System

Chapter 479, Senate Bill 251, amends Section 13(1) of Article 73B increasing the percentage of funds that may be invested in common stocks.

---

*All amendments revise Article 77, unless otherwise indicated.

Employees' Retirement System

Chapter 920, House Bill 137, amends Section 14(1)(e) of Article 73B allowing additional contributions by members subject to conditions and saving provisions.

Harford County Schools

Chapter 368, House Bill 1200, amends Section 14 increasing the membership of the County Board of Education of Harford County and providing for the terms of office of the additional members.

Higher Education Loan Corporation

Chapter 115, Senate Bill 184, amends Sections 5, 6, and 7(a) of Article 43A concerning the powers and duties of the Maryland Higher Education Loan Corporation.

Howard County Schools

Chapter 521, Senate Bill 484, amends Section 49 increasing the travel and expense allowance of members of the Board of Education of Howard County.

Kent County Schools

Chapter 516, Senate Bill 441, amends Section 6(a) and adds Section 14A making special provisions for the membership and expense allowance for the county board of education.

Medical Technicians Training

Joint Resolution 38, H.J.R.-54, calls for the development of a plan and budget estimate for assumption by the State of part of the costs of nurse and medical technicians training.

Scholarships

Chapter 637, Senate Bill 667, adds Section 284J providing generally for the award of scholarships by the State Scholarship Board for the study of medicine.

Scholarships

Chapter 754, Senate Bill 278, revises and amends Article 7 revamping the State scholarship program.

School Finance

Chapter 623, Senate Bill 7, amends Section 220(a) concerning the State's share of current expenses in the public schools.

State Bonds—Community Colleges

Chapter 636, Senate Bill 634, amends Section 5(c) of Chapter 22 of 1962 and Chapter 27 of 1964 changing the maximum amount of State funds available under the Community College Construction Loans of 1962 and 1964 toward the total cost of construction of any community college project.

State Colleges

Chapter 431, House Bill 809, amends Section 165(e) providing that the qualifications and tenure of the presidents of the State Colleges shall be solely within the discretion of the Board of Trustees of the State Colleges.

State Superintendent of Schools

Chapter 503, Senate Bill 232, amends Sections 40 and 75 concerning the powers of the State Superintendent of Schools with respect to remodeling or constructing school buildings.

Teachers' Retirement System

Chapter 195, Senate Bill 255, amends Section 113(2)(e)(1) correcting the laws as to the computation of pensions payable to members of the system.

Teachers' Retirement System

Chapter 481, Senate Bill 253, amends Section 112 permitting members of the Teachers' Retirement System to obtain service credit for service rendered by them under an emergency teaching certificate.

Teachers' Retirement System

Chapter 614, Senate Bill 508, amends Section 113(8)(b) to provide for the option No. 2 benefit to the spouse.

Teachers' Retirement System

Chapter 718, House Bill 136, amends Section 116(1)(d) allowing additional contributions by members subject to conditions and saving provisions.

Teachers' Retirement System

Chapter 751, Senate Bill 250, amends Section 115(1) increasing the percentage of total funds that may be invested in common stocks.

Washington County Schools

Chapter 209, House Bill 378, adds a new Section 63A authorizing the Board of Education of Washington County to permit private and parochial schools within the county to connect their facilities to the county's closed circuit educational television system.

Washington County Schools

Chapter 331, House Bill 409, amends Section 49 increasing the annual allowance of the members of the Washington County Board of Education.

NOTES FROM THE MINUTES OF THE STATE BOARD OF EDUCATION

July 1, 1964

The State Superintendent of Schools called attention to a law passed by the 1964 General Assembly which requires pupils, faculty members, and visitors who work in or visit certain types of science laboratories and vocational shops to use protective eye devices as safety measures. The Assistant Attorney General had expressed concern regarding this law. He felt it was not complete enough for the local schools, and the superintendents felt it was not simple enough for interpretation. Dr. Sensenbaugh provided each of the Board members with a copy of Chapter 24 of the Laws of the State of Maryland, 1964 Regular Session (Senate Bill 76), and with a copy of the regulations governing the use and care of protective eye devices in the public schools of Maryland, which had been developed by a committee representing the State Department of Education and the local school systems and approved by the school superintendents at their meeting on June 19, 1964.

The State Board of Education then adopted Bylaw 561:1—Regulations Governing the Use and Care of Protective Eye Devices in the Public Schools of Maryland (Resolution No. 1964-27).

Other action of the State Board included:

Approved the appointment of Dr. Quentin L. Earhart as Assistant State Superintendent in Administration and Finance effective August 1, 1964. This position was held by Dr. Paul D. Cooper until July 1, 1964, when he resigned to become Director of the State Bureau of Fiscal Research. Prior to coming to the State Department, Dr. Earhart had been Assistant Superintendent of Instruction with the Baltimore County Public School System.

Repealed and reenacted, with amendments Bylaw 312:2—Principles and Standards: Public Secondary Education in Maryland (Resolution No. 1964-26). This Bylaw provides that the standards for the organization, administration, and conduct of public high schools of the twenty-three counties of the State shall include those set forth in the document, *Principles and Standards: Public Secondary Education in Maryland (1964).*

August 26, 1964

Members of the State Board were given a report on the War Orphans Educational Benefits Program. This program, instituted under Section 49, Article 96½ of the Annotated Code of Maryand as an administrative responsibility of the State Department of Education, now provides up to $500 per year for a child of a veteran who died as a result of service with the armed forces of the United States and who was a resident of Maryland at the time of his induction into military service. The

award is for post-high school training and may be used at any institution approved by the State Department of Education. Recipients of these awards may attend institutions in or out of Maryland, and the grant may be used for such purposes as tuition, matriculation fees, board, room rent, books, and supplies.

When a person is identified as being eligible for participation in this program, he remains under its coverage until he reaches the age of twenty-four or until his educational program is completed, whichever comes first. If the individual receiving this award has served in the military service of the United States, the age limit is raised to twenty-seven. This Department reimburses expenses to the institution attended by the awardee upon receipt of properly authenticated invoices.

Following is a summary of the program since its inception in 1954:

School Year	*No. of Active Awards*	*Total Amt. Paid*	*Average Pymt.*
1954-55	10	$ 2,847.73	$284.77
1955-56	16	4,274.89	267.18
1956-57	23	6,213.20	270.14
1957-58	26	7,407.44	284.90
1958-59	30	8,408.49	280.28
1959-60	71[1]	19,287.68	271.66
1960-61	112	31,146.64	278.10
1961-62	179	45,758.61	277.98
1962-63	237	106,401.73	448.95[2]
1963-64[3]	243[4]	102,279.29	420.90

[1] The Veterans Administration began publicizing this program in 1960.

[2] The maximum yearly amount per award was raised from $300 to $500.

[3] The federal government, by P. L. 88-361, has broadened the coverage provided by the Veterans Administration in its separate program of assistance to veterans' families. Previously, the V.A. provided assistance only to families of veterans who had died in or as a result of military service. The new law broadens V.A. coverage to include families of veterans who are partially or totally disabled in addition to the families of deceased personnel.

[4] The Maryland State Legislature in its 1964 session extended eligibility for veterans in the program to age twenty-seven.

The Board was provided with information on the status of the proposed State-wide educational television system. It then approved Resolution No. 1964-29 which enunciates the State Board's position relative to the development of a State-wide system of educational television. Included in this Resolution, the State Board of Education authorized and directed the State Superintendent of Schools and the staff of the State Department of Education concerned with the development and uses of educational television, in cooperation with the State Educational Television Advisory Committee and, where possible, with interested citizen groups such as the Maryland Council for Educational Television, to proceed on the basis of the position of the Board relative to educational television

1. to request the Governor to include in his 1965-66 budget the necessary funds to implement the first step of the State-wide educational television system. The specific amount to be requested will be reviewed for approval by the Board following consultations of the State Superintendent and his staff with the appropriate State officials and agencies, such as the State Planning Department, the Department of Budget and Procurement, the Department of Public Improvements, and the Board of Public Works.
2. to inform members of the Legislature and seek their support
3. to inform and invite the assistance and support of foundations, institutions, and interested individuals
4. to inform and seek the support in this venture of the friends of education and the general public.

The Board also authorized the State Superintendent of Schools to communicate further with the southern Regional Education Board and other appropriate agencies with a view toward pursuing the course of action suggested in a letter from Dr. William L. Bowden concerning the possibilities of interstate cooperation in capital and operating costs of a broadcast television station.

Adopted Resolution No. 1964-28 approving the State Department of Education budget requests for Headquarters, Vocational Rehabilitation, and Employment of the Handicapped in the amount of $5,021,728.

Other action of the State Board included:

Approved staff appointments which included:

Ellwood F. Adams	Appointed Educational Supervisor of Manpower Training, effective July 6, 1964
Walter F. Edwards	From Assistant Supervisor to Supervisor of School Lunch Program, effective June 3, 1964
Irving W. Herrick	Appointed Educational Supervisor of Industrial Arts, effective September 1, 1964
John W. Powder, Jr.	From Supervisor of Finance to Chief, Division of Audits and Accounts, effective June 17, 1964
Thomas E. Rowan	Appointed Educational Supervisor of Mathematics, effective August 26, 1964
R. Kenneth Barnes	Appointed Assistant State Superintendent of Vocational Rehabilitation, effective December 2, 1964

Mr. Barnes succeeded Mr. Robert C. Thompson who retired, effective December 31, 1964. In June, 1946, Mr. Barnes joined the Maryland State Department of Education as a vocational rehabilitation counselor. He served in this capacity until 1951 when he became Director of Rehabilitation in the Maryland State Department of Mental Hygiene. In 1954 he became Director of Personnel for that department. After holding this position for one year he became Assistant Superintendent of Spring Grove Hospital in Catonsville. He held this position until 1960 when he was appointed to his present position — Chief of the Division of Administration and Finance for the State Department of Mental Hygiene.

October 7, 1964

At the request of the State Superintendent of Schools, Mr. James L. Reid, Director of Vocational Education, outlined possible solutions for the establishment of area vocational schools in three areas of the State which require consideration on other than a local county basis—Eastern Shore, Western Maryland, and Southern Maryland.

Action of the State Board included:

Adopted Bylaw 132:3 which permits professional staff members of the State Department of Education to pursue such graduate study during the regular school year and during summer sessions as may be necessary to qualify for higher degrees. The State Superintendent is authorized to approve the undertaking of such study and the administrative arrangements upon application by a staff member (Resolution No. 1964-34).

Repealed Bylaw 432:1, Standards for Approval of Public and Nonpublic Evening High Schools. This bylaw had been superseded by Bylaw 312:2, Section VI-H—Principles and Standards: Public Secondary Education in Maryland (Resolution No. 1964-35).

Adopted Bylaw 750:2, Confidentiality of Pupil Records, which provides that individual pupil records maintained by teachers or other school personnel under the provisions of the Code of Bylaws are to be confidential in nature, and access to such records may be granted only for the purpose of serving legitimate and recognized educational ends. Individual pupil records, with the exception of such records as are designated as permanent, and with such other exceptions as provided by the law, should be destroyed when they are no longer able to serve such legitimate and recognized educational ends (Resolution No. 1964-36).

Adopted Bylaw 750:3, Access of Parents to Pupil Records. This bylaw provides that all records of a pupil maintained under the provisions of the Code of Bylaws, including confidential

records, shall be available to that pupil's parents or legal guardian in conference with appropriate school personnel. For purposes of this bylaw, the term "records" shall not include a teacher's personal notes which are not made available to any other person. (Resolution No. 1964-36).

Adopted Bylaw 421:2 which provides that a cooperative program shall be undertaken by the Division of Vocational Rehabilitation of the State Department of Education, in cooperation with the Department of Mental Hygiene of the State Board of Health and Mental Hygiene, for the purpose of developing improved rehabilitation services for mentally disabled citizens of Maryland, according to the "Agreement of Cooperation between the State Board of Health and Mental Hygiene and the State Board of Education." (Resolution No. 1964-37).

Repealed and reenacted Bylaw 924:1 which provides that the rules and regulations governing the approval of nonpublic tutoring schools shall include those set forth in the Maryland Standards for Nonpublic Schools - Tutoring Schools - 1964 (Resolution No. 1964-38). These standards cover the following subjects: faculty, courses of study, pupil records, terminology, facilities and equipment, and certificates.

November 25, 1964

Dr. Sensenbaugh informed the Board that the Council of Chief State School Officers, at its meeting in New York City during the week of November 15, 1964, announced plans to secure a foundation grant in order to have an intensive study made of state departments of education, working jointly with the Maryland State Board of Education. It is hoped that a sourcebook on state departments of education will be prepared giving such information as how superintendents obtain their positions and how the state boards receive their appointments, and will include a study of central state staff organizations and the duties and functions of certain offices and positions. Dr. David W. Zimmerman will represent the Maryland State Department of Education in this project.

Other action of the Board included:

Voted to join the Maryland Association of Boards of Education on a limited membership basis, with no privilege to vote or hold office, and with the dues being paid as a part of Board expenses.

Changed the structure of standing committees of the Board from six to three with two members of the Board assigned to each committee. Committees created were: (a) Instruction, Vocational Education, Library; (b) Research and Development, Federal-State Relations; (c) Finance and Administration, Accreditation and Certification, Vocational Rehabilitation.

Approved a minimum salary scale for public library administrators to be drafted into a proposed bill to be submitted to the General Assembly. This scale was based on recommendations of a special committee appointed in 1963 which first reported to the Board at its November, 1963, meeting. Their proposals with Department recommendations were later presented to library administrators and boards of library trustees. These groups requested the State Superintendent to seek to have the proposal introduced and enacted in the 1965 session of the General Assembly.

Approved the following staff changes:

Richard K. McKay..... Appointed Acting Director of Division of Research and Development, effective January 13, 1965. Dr. McKay replaced Dr. Wesley N. Dorn who was granted a one-year leave of absence beginning November 17, 1964, as Director of the Maryland Advisory Council for Higher Education.

Raymond I. Muller..... Appointed Supervisor of Instruction (Research) effective January 6, 1965.

Approved the public education budget requests, exclusive of the Maryland State Teachers' Retirement System unit, in the amount of $156,627,319 for 1965-66 as follows:

Headquarters	$ 2,080,875
Vocational Rehabilitation	2,922,812
Aid to Education	149,859,151
State Aided Educational Institutions	1,746,440
Employment of the Handicapped	18,041
Total	$156,627,319

Adopted Resolution No. 1964-40 which repealed and reenacted Bylaw 322:1, State Plan for Vocational Education. It provides rules and regulations for carrying out the provisions of the federal laws relating to vocational education as set forth in *Maryland State Plan for Vocational Education,* November 25, 1964.

Adopted the following resolution (No. 1964-41) regarding Dr. Robert C. Thompson.

WHEREAS, Dr. Robert C. Thompson, Assistant State Superintendent for Vocational Rehabilitation, will retire from the State Department of Education on December 1, 1964, after heading Maryland's vocational rehabilitation program for its disabled citizens for thirty-five years; and

WHEREAS, During his career in State Service Dr. Thompson has made significant contributions to many aspects of Maryland's educational program, including the organization of the special education program for handicapped school children and the improvement of procedures relating to school attendance; and

WHEREAS, Dr. Thompson's contribution to vocational rehabilitation on the national scene has been outstanding through his active participation as a past president of the National Rehabilitation Association and on the state and local scene through his active work in the Maryland Rehabilitation Association and his participation in the widely viewed television program, "Comeback," which tells the story of the rehabilitated; and

WHEREAS, Dr. Thompson has assumed a community leadership role as well as his educational leadership role by being an active participant in civic, fraternal, and church activities and organizations; and

WHEREAS, The members of the State Board of Education will sincerely miss the educational contributions and valued friendship of Dr. Thompson; now.

THEREFORE, BE IT RESOLVED, That the State Board of Education and the State Department of Education officially express to Dr. Robert C. Thompson, Assistant State Superintendent for Vocational Rehabilitation, their sincere appreciation for the invaluable service and leadership he has given to the vocational rehabilitation program for Maryland's citizens; and

BE IT FURTHER RESOLVED, That the State Board of Education and the State Department of Education wish Dr. Thompson much happiness and pleasure in future years.

Dr. Sensenbaugh informed the Board that Mr. Charles L. Eby, President of the National Rehabilitation Association, has advised the State Department of Education that the recipient of the W. F. Faulkes Memorial Award for 1964 is Dr. R. C. Thompson. He added this is the highest award which is given by the National Rehabilitation Association. It was presented at the Annual Conference Banquet at the Bellevue-Stratford Hotel in Philadelphia on November 10, 1964.

Adopted the following resolution on Maryland's policy concerning transfer and financial assistance of community-junior college students to State colleges:

WHEREAS, The Board of Trustees of the Maryland State Colleges, the Maryland Association of Junior Colleges, and the Maryland State Board of Education recognize their inter-relatedness in the program of higher education in the State of Maryland as set forth in the recommendations of the Report of the Commission for the Expansion of Public Higher Education in Maryland; and

WHEREAS, The Board of Trustees of the Maryland State Colleges, the Maryland Association of Junior Colleges, and the Maryland State Board of Education recognize their responsibility in aiding every Maryland student, both native and transfer, to proceed to his ultimate educational goal consistent with his ability; and

WHEREAS, The Board of Trustees of the Maryland State Colleges, the Maryland Association of Junior Colleges, and the Maryland State Board of Education recognize that there always will be reason for a certain number of students who can and should begin their college career at the four-year institution; and

WHEREAS, The Board of Trustees of the Maryland State Colleges, the Maryland Association of Junior Colleges, and the Maryland State Board of Education recognize that in certain instances it may be in the best interest of all concerned for certain numbers of students to begin their baccalaureate program in a comprehensive two-year community-junior college; and

WHEREAS, The Board of Trustees of the Maryland State Colleges, the Maryland Association of Junior Colleges, and the Maryland State Board of Education recognize that the growing need for certain career-type programs of less than four years in duration can and should be provided by the two-year community-junior colleges;

NOW, THEREFORE, BE IT RESOLVED, That every effort will be made to facilitate the transfer of students from the community-junior college of the State of Maryland to the State College. Liberal interpretation will be made of conflicting courses.

BE IT FURTHER RESOLVED, That the Associate in Arts degree student who is a candidate for transfer to a State College will be given priority, assuming he meets the institution's requirement for date of application. Both the community-junior colleges and the State Colleges will discourage a student who is a potential transfer candidate from transferring before he has completed the Associate in Arts degree.

BE IT FURTHER RESOLVED, That the Associate in Arts degree student will be given every consideration with respect to financial assistance, housing accommodations and other aid consistent with the general policies of the Board of Trustees of the State Colleges, and the policies of the particular institutions involved.

BE IT FURTHER RESOLVED, That, respecting the autonomy of the institutions involved, lines of communication should be kept open so as to minimize any difficulties that may arise in the transfer process. This implies a close relationship between and among the institutions and the departments or divisions involved.

January 13, 1965

At the request of the State Superintendent, Mrs. Grace A. Dorsey discussed Parts Two, Three, and Four of the Report of the State Committee to study the elementary school program—"Design for Planning the Program of the Elementary School." Part Two covered elementary programs in Music; Physical, Health and Safety Education; Science; and Social Studies; organizing for learning; staffing the elementary school; providing an environment for effective learning; meeting varied specialized needs of children; establishing effective school-community relationships; and evaluating the elementary school. Implementing the elementary school program and looking ahead in elementary education were covered by her discussion of Parts Three and Four of the Report.

Endorsing proposed school legislation in principle, the Board requested the Deputy State Superintendent, Dr. David W. Zimmerman, to work with the Assistant Attorney General to prepare bills in the following areas:

Increase the limitation for State support of Maryland students in State public community colleges from $225 to $300 per student and to provide free tuition for those public community college students preparing to teach.

Establish regional junior colleges.

Use by secondary schools of junior college facilities for vocational-technical and advanced programs.

Amend statutes concerning school district trustees to indicate that it is optional for local school systems to have such trustees; and where trustees are appointed their role will be advisory to the local boards of education.

Revise Section 44 of Article 77, Public School Laws of Maryland, to increase from $300 to $5,000 the limitation requiring the State Superintendent's approval for remodeling or construction of new school buildings.

Revise Section 75 of Article 77, Public School Laws of Maryland, to increase from $1,000 to $5,000 the limitation for advertising for bids.

At the request of the State Superintendent, Mr. Paul E. Huffington, Director of Instruction, presented to the Board the Maryland State Plan for Adult Basic Education Programs under Title II-B, Public Law 88-452. Under the provisions of this Title the Maryland State Board of Education has the responsibility for implementing the program. Dr. Geneva E. Flickinger, Supervisor of Adult Education, reported that there are approximately 196,000 adults who would qualify for the program since they do not have the equivalent of the fourth-grade level of school.

The Board then adopted Bylaw 431:2, State Plan for Administering the Adult Basic Education Program under the Provisions of the Economic Opportunity Act of 1964 (Resolution No. 1965-1). The plan is essentially a contract between the State Board of Education and the United States Office of Education, stipulating the procedures for the expenditure of federal funds for adult basic education. It sets forth the basic administrative policies, legal requirements for adult basic education, and qualifications of teachers and supervisors. The following major areas are covered: purpose of adult basic education, State plan administration, cooperative arrangements between the State Department of Education and other public and/or nonpublic agencies, programs of instruction, pilot projects. State technical and supervisory servces, and fiscal control and fund accounting procedures.

At the request of the Board, the Assistant Attorney General reviewed the opinion of the Court of Appeals on an appeal made by the Board of Education of Montgomery County from an order of the Circuit Court for Montgomery County dismissing the Board's petition for a writ of mandamus against the Montgomery County Council. The Board's petition sought the following re-

lief: (1) that the Council be directed to pay over to the Board all monies collected from the school tax levies and not appropriated at the end of the fiscal year 1962-63; (2) that the Council be directed to approve the Board's request for certain professional and clerical assistants; (3) that the Council be directed to furnish adequate reasons in writing for its refusal to approve certain of the Board's requests in the 1963-64 annual budget; and (4) that the Council be directed to eliminate from the current school tax levy the item representing a tax for debt service. The Court ruled, concerning the unappropriated surplus, that the mandamus which the Board asks for the payment of the surplus to it must be granted. Any interest which has been earned is to be paid theron. As to professional and clerical assistants, the Legislature has provided that the Board's determination is binding upon the Council, and that the school levy must raise the necessary funds. As to reasons for amounts denied, the statute requires written reasons for such denial. The Council is not bound by representations by its staff on such a matter; it cannot delegate to its employees the performance of a duty which the Legislature has specifically provided shall be performed by the Council itself. As to the debt service tax, the inclusion of the debt service in the levy was proper.

Other action of the State Board included:

Approved staff changes in the State Department or Education which included:

Gary Gray	Appointed Educational Supervisor in the Division of Instruction, effective January 6, 1965.
John R. Onder	Appointed Supervisor of School Lunch Program, effective February 1, 1965.

Adopted Resolution No. 1965-2 which provides that the Board request the Governor make provision for approving the utilization of available federal funds for developing a total comprehensive vocational rehabilitation plan for Maryland, one chapter of which shall include a study of the need for and recommendations regarding a comprehensive Vocational Rehabilitation center.

Adopted Resolution No. 1965-3 which recommends that the Governor designate the Division of Vocational Rehabilitation as the Agency authorized to establish a counseling, evaluation, and referral service at each Selective Service Station in the State.

This action was taken at the request of President Lyndon B. Johnson who had requested the Governor of Maryland to designate a state agency to coordinate a counseling, evaluation, and referral service for youths who by reason of mental or physical disabilities are disqualified for duty in the armed services.

Adopted Resolution No. 1965-4 which requests funds in the 1965-66 capital and operating budgets to implement the first step of the proposed State-wide ETV system.

Repealed and reenacted Bylaw 322:1, State Plan for Vocational Education (Resolution No. 1965-5). This plan is essentially a contract between the State Board of Education and the United States Office of Education, stipulating the procedures for the expenditure of federal vocational funds in Maryland. It sets forth the basic administrative policies, the legal requirements for vocational education, and the qualifications for teachers and supervisors. The following major areas are covered: administration and supervision; State fiscal and accounting procedures; program of instruction; vocational guidance and counseling services; program of teacher training; research, demonstration, and experimental programs; construction; work study; vocational education program fields (agriculture, distributive education, fisheries occupations, health occupations, home economics, business and office occupations, technical education, trades and industry, other cooperative programs); interrelationships among program fields.

February 24, 1965

At the request of the President of the State Board, the Assistant Attorney General stated that the question in the case of the Board of Education of Anne Arundel County versus the County Commissioners of Anne Arundel County was whether the County Commissioners have the power to reduce a school budget submitted by the County Board of Education, and the specific reduction in this case was $760,000. The reductions fall into five categories: (1) positions of professional and clerical personnel—the Court ruled that this was an improper reduction; (2) supplies for the office of the County Superintendent—the Court ruled that this was an improper reduction; (3) teachers' salaries—the Court ruled that it is within the discretion of the County Commissioners to make this reduction; (4) County celebrations—the Court ruled that this reduction appears justified; and (5) books and materials of instruction—the Court ruled the County Commissioners have the right to reduce these items. The Court also ruled that a reduction relating to the transportation of nonpublic school children is improper. The Assistant Attorney General stated he had not heard of an appeal taken in this case.

Action of the State Board included:

Adopted Resolution No. 1965-7 which includes the repeal of Bylaw 310:1 and repeal and re-enactment of Bylaws 311:1 and 312:1. Bylaw 311:1 provides that the policies for the organization, administration, and conduct of public elementary schools shall include those set forth in *Design for Planning the Program*

of the Elementary School (1964). This publication sets forth both broad and specific policies for the organization, administration, and conduct of a successful public elementary school program. It discusses the bases for planning the program, in terms of the philosophy and goals of the elementary school and the factors influencing elementary education, and sets forth some basic considerations in planning the program in various curriculum areas. It also discusses methods for the implementation of the program, including such matters as organization and staffing, environment, specialized pupil needs, school-community relationships, and factors of evaluation. The document concludes with a brief treatment of some of the more important emerging trends in elementary education. Bylaw 312:2 provides that the general policies for public secondary school instruction shall include those set forth in *Policies and Programs: Public Secondary Education in Maryland* (Maryland School Bulletin, Vol. XXXIX, No. 3, April, 1963). This bulletin sets forth desirable elements for a successful public secondary school program of instruction. The public secondary school is placed in its historical perspective, and its underlying philosophy and goals are explored. The bulletin then treats the leadership and organizational aspects of the program. The distinctive aspects of junior and senior high schools are treated briefly. Considerable attention is devoted to the policies of public secondary school instruction in each of several curriculum areas. Finally, instruction as a learning process is treated, followed by a brief statement in regard to pupil services and program and pupil evaluation.

Adopted Resolution No. 1965-8 which provides that the State Board of Education approve a request to the Federal Vocational Rehabilitation Administration for funds to conduct a selected demonstration project showing systematic teaching of mobility to blind high school students and other recently blinded persons in Prince Georges and Montgomery counties.

Adopted Resolution No. 1965-10 which provides that the Maryland State Board of Education urge the Advisory Board of Higher Education to give priority in its considerations to the problems of extending present graduate programs and offering new ones in the colleges and universities of the State. These are the chief institutions where teachers of the State take programs of studies in post-baccalaureate programs.

Appointed George E. Klinkhamer as Educational Supervisor of Special Education, effective July 1, 1965.

Approved the revised State plan to implement amendments to the National Defense Education Act of 1958 to include history, civics, geography, English, and reading. Originally the Act covered science, mathematics, and modern foreign languages only. (Resolution No. 1965-14).

Approved Resolution No. 1965-15 which provides that the State Board of Education hereby agrees that it will comply with Title VI of the Civil Rights Act of 1964 (P.L. 88-352) and all requirements imposed by or pursuant to the regulations of the Department of Health, Education and Welfare issued pursuant to that title, to the end that no person shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program of activity for which the applicant receives Federal financial assistance from the Department; and hereby gives assurance that it will immediately take any measure to effectuate this agreement.

Endorsed in principle the use of State funds to help pay for kindergartens in Maryland. This action related to proposed legislation on this subject being sponsored by the Maryland Congress of Parent Teacher Associations.

Endorsed House Bill 340 to provide duty-free lunch periods for teachers as introduced under the sponsorship of the Maryland State Teachers Association, in the 1965 General Assembly.

April 14, 1965

The Board approved the following resolution on the centennial of the American Association of School Administrators:

WHEREAS, The American Association of School Administrators has served the American people through the promotion and improvement of education for one hundred years; and

WHEREAS, The school administrators of the State of Maryland played an important role in the organization of this Association in Harrisburg, Pennsylvania, on August 17, 1865; and

WHEREAS, The first Secretary of the Association was The Reverend Libertus VanBokkelen, LL.D., State Superintendent of Public Instruction; and

WHEREAS, The school administrators of the State of Maryland have continued through the years to alert the public to the necessity for appropriate educational programs to move ahead with the changing society; and

WHEREAS, The Maryland State Board of Education has maintained and elevated the professional and ethical standards of the teaching profession in general and its administrative and supervisory service in particular in its effort to achieve the goals set by the American Association of School Administrators;

NOW, THEREFORE, BE IT RESOLVED, That the Maryland State Board of Education applaud the leadership of the school administrators in making and implementing school policies which are consistent with sound educational practices; and

BE IT FURTHER RESOLVED, That the Maryland State Board of Education commends the American Association of School Administrators for its vital role in achieving a unified professional strength for the improvement of education.

Action of the State Board included:

Authorized the State Superintendent of Schools on behalf of the State Board to expend contributions by private organi-

zations or individuals for meeting the State's share for establishing and operating rehabilitation facilities and workshops. This action was in accordance with statutory authority to accept funds from private sources. (Resolution No. 195-19). Following this action the Board approved a project to extend and improve Vocational Rehabilitation Services in cooperation with the Jeanne Bussard Training Workshop in Frederick, Maryland. (Resolution No. 1965-20). In explaining this program, Mr. R. Kenneth Barnes, Assistant State Superintendent in Vocational Rehabilitation, stated that the Frederick County Association for Retarded Children had taken steps to start a sheltered workshop to evaluate, train, and employ mentally retarded young adults in Frederick County. The major operation will center around subcontract work which will be obtained in the community and will include such things as collating, subassembly, and light manufacturing. In order to get the evaluation and training phases of this program in operation, it will be necessary for the Jeanne Bussard Training Workshop to obtain additional financing with which to purchase certain equipment. The Workshop will also be dependent upon the sponsorship of individual clients in evaluation and training by the Division of Vocational Rehabilitation. As approved by the State Board of Education the Division of Vocational Rehabilitation will accept a contribution from the Frederick County Association for Retarded Children which will be used to match Federal Vocational Rehabilitation funds.

Authorized the Mount Providence Junior College to confer Associate in Arts degrees commencing in August, 1965. (Resolution No. 1965-23).

May 26, 1965

In the annual election of officers of the State Board of Education, Mr. Jerome Frampton, Jr., and Mr. William L. Wilson were re-elected president and vice president, respectively.

At the request of the State Superintendent, Dr. Richard K. McKay, Acting Director of Research and Development, stated that on April 20, 1965, the State Superintendent of Schools appointed a State Committee on Pupil Data Systems to review all items of information and forms used in the present system of pupil data. The Committee will develop recommendations concerning pupil information which is to be collected and the redesigning of forms to provide for greater use of automatic data processing. One of the outcomes of the Committee's work will be a Pupil Accounting Handbook to serve as a guide in the development of systems of pupil data throughout the State. Mr. Maxwell Burdette of Montgomery County has accepted the Chairmanship of the Committee which will involve as members and consultants representatives of all the divisions of the Depart-

ment and all of the local school systems. With improved and promptly-supplied data on pupils in hand, teachers, counselors, administrators, and others can do a better job of providing the appropriate instruction for each child and adult in Maryland public schools.

At the request of the State Superintendent, Dr. Harold D. Reese stated that guidelines and procedures had been prepared for establishing a regional community college. It is hoped that these guidelines will enable the State Department of Education to proceed in establishing regional colleges on the Eastern Shore.

Other action of the State Board included:

Granted approval to Morgan College to introduce certain graduate programs with authorization to confer Master's degrees in these programs. (Resolution No. 1965-25)

Approved a revised contract with the Enoch Pratt Free Library, the City of Baltimore, and the State Department of Education to provide for the installation and use of a teletype communications network to facilitate borrowing circulating materials and using certain reference services throughout the State of Maryland by certain authorized agencies and individuals. These include authorized public libraries, State-supported hospital and correctional institutions, and individuals in certain cases as defined by mutual agreement between the Pratt Library and the State Department of Education.

Approved Staff changes in the State Department of Education which included:

Betty M. Franklin	Appointed Educational Supervisor of Accreditation, effective August 1, 1965
Allan Gaddis	Appointed Educational Supervisor of Business and Office Education, effective July 1, 1965
Billy B. Reeves	Appointed Supervisor of School Plant Planning, effective July 1, 1965
Gilbert Schiffman	Appointed Educational Supervisor of Reading, effective July 1, 1965

DIVISION OF INSTRUCTION

GENERAL ELEMENTARY SCHOOL SUPERVISION

The activities of the two general State supervisors of elementary schools were related closely to the work of the previous year. Curriculum revision in the local schools systems continued to be one of the major tasks with emphases on social studies, language arts, and science. Close cooperation of the general supervisors and the special supervisor of science has resulted in a more stimulating program in that area. There continues to be a need for other special subject supervisors in the State Department of Education, especially in music, social studies, art, and language arts.

There were, however, several specific activities which have implications for the future and which seem to indicate important emphases in the present and the years ahead.

Greater Emphasis on Early Childhood Education

During the latter part of this school year the federal government instituted the Head Start program for preschool children. Twenty-three of the local school systems developed programs which were enthusiastically received by the public. Teachers, administrators, and supervisors of elementary schools were actively involved. This program along with new research on the importance of early childhood activities has already done much to alert the school systems to the need for early childhood education in the public schools. The elementary supervisors kept informed of the progress of the Head Start programs, visited teacher-training workshops, and helped in developing some of the programs.

More responsibility, however, was directed toward the establishment of summer catch-up programs for disadvantaged children and youth in schools in fifteen of the local school systems. This, too, was a federally-financed program and included activities in the areas of enrichment and remedial instruction, recreation, and health. The supervisor of elementary schools for the western part of the State assumed responsibility for the total State in this program.

Both supervisors devoted time to working with PTA and lay educational groups as they became increasingly interested in kindergartens in the public schools. Free kindergartens are at the present time a part of the school system in Baltimore City and Montgomery county. Several other systems have kindergartens supervised by the local school systems but paid in part by the parents of the children attending.

Several of the local school systems are giving particular attention to the development of oral language skills in their programs for young children. Pilot studies with disadvantaged chil-

dren, stressing oral communication and emphasis on the experience approach to the teaching of reading in the early grades, are examples of this interest.

The Impact of Federal Legislation

The involvement of the federal government in the educational program has brought new and different types of activities. The elementary supervisors have been engaged in the expanded NDEA programs this year in assisting in the writing of State guidelines and in the approval of elementary school projects in reading, English, and social studies. These areas will have more and better materials of instruction as projects are improved and more personnel are employed to implement the programs.

Initiation of Newer Programs

Considerable time was devoted to the evaluation of newer programs in the local systems, some of which seem to have doubtful value while others are promising and stimulating. Included were programs in reading — using the initial teaching alphabet of 43 symbols, the experience approach for beginning reading and individualized procedures in both primary and upper grades; various plans for providing guidance in the elementary schools (see IRCOPPS projects in the report of Pupil Personnel Services); use of different content in the social studies, stressing the development of concepts in economics; new programs in science organized on a conceptual structure; and different plans for organizing children for learning—team teaching, use of resource teachers, ungraded classes and departmentalization, supplementing or replacing the self-contained classroom.

State Conferences

The annual Maryland Conference on Elementary Education for supervisors and principals of elementary schools had as its theme this year, "Meeting the Challenge of Change." Speakers at the general sessions were Dr. Frank T. Rafferty, Director, Child Psychiatry Service, University Hospital in Baltimore, who spoke on "The Impact of Our Changing Culture on Children"; Miss Anne S. Hoppock, Director of Elementary Education in the New Jersey State Department of Education, whose address was entitled, "Strategy for Making Changes in the School Program"; Dr. Ray L. Birdwhistell, Department of Psychiatry at Temple University Medical Center, who discussed "Change—Threat or Promise"; and Dr. James A. Sensenbaugh, the new State Superintendent of Schools, who presented his ideas concerning "Meeting the Challenge of Change."

Assemblies at the Conference had as speakers Dr. H. Gerthon Morgan from the University of Maryland on "Mental

Health in the Classroom"; Dr. Jeanne L. Noble from New York University on "Widening Cultural Opportunities for Children"; Dr. James D. Raths from the University of Maryland on "Helping Children Develop Values"; and Dr. Mary Spencer from the Malden Public Schools in Massachusetts on "Meeting Health Needs of Children."

Cooperative Project in Planning Elementary Schools

Among educators in Maryland there was an increased interest in the problems involved in planned changes that were resulting from rapidly growing communities, new technology, and newer communication media. Indicative of this was the cooperative project undertaken by the Howard County Board of Education and the State Department of Education to make a study of the desired programs and needed facilities for the schools to serve the proposed new community, Columbia. Study committees were appointed to work on plans for a dynamic, forward-looking school program that will grow and change with the developing community. One of the State supervisors of elementary schools served as a member of the Steering Committee and was actively involved in discussions, visitations to outstanding school systems outside of the State, and in the formulation of tentative plans for the elementary schools.

Conservation Education

One of the State supervisors of elementary schools continued to cooperate with other State agencies interested in conservation by attending meetings and actively participating in the programs of the Maryland State Soil Conservation Committee and Conservation Education Council. She assisted in the planning of the Southern Maryland Tour for Teachers conducted during Maryland Land Week.

GENERAL ADULT EDUCATION

General adult education continued to expand during 1964-65. Art, foreign languages, modern mathematics, and high school academic subjects were the most frequent offerings, with secondary education attracting the most adults.

In March the State Superintendent of Schools devoted part of a meeting with local superintendents to a discussion of general adult education with emphasis on the program needs in Maryland.

During the year, preparations were made to offer adult basic education under Title II-B of the Economic Opportunity Act of 1964. A State-wide Committee assisted the State Supervisor of Adult Education in canvassing the needs and discussing possible programs. A State Plan was written, accepted by the State Board of Education, and approved by the U.S. Commis-

sioner of Education. Finally, supervisors responsible for adult education in local school systems attended a spring meeting at which the potentialities for Maryland were discussed. Two school systems initiated programs in fiscal 1965.

CIVIL DEFENSE EDUCATION

The Civil Defense Adult Education Program completed its third year of operation. The program is a joint federal-State project with the federal government providing 100 percent of the financing.

For the year, 2,031 students completed the personal and family survival course in fifty-five different courses throughout the State. Two classes were held to train teachers for the program and eleven teachers were trained. Twelve visits were made to county homemaker clubs to promote the CDAE course. One class resulted from these visits.

The coordinator taught the following: a class of 4-H youngsters during their annual workshop at the University of Maryland; a pilot class of physical education students in Anne Arundel County; and class of State Office Building employees.

Working with the Director of Training for the State Penal Institutions resulted in nineteen classes of the personal and family survival course.

St. Mary's County was the first county in the State to use the CDAE program as part of its high school curriculum. The course was taught to high school seniors in the social studies curriculum.

Groundwork was laid during the year for a summer training program at Andrews Air Force Base. This will bring the largest number of students into the course since the program's inception in Maryland.

CURRICULUM DEVELOPMENT ACTIVITIES

The two supervisors of curriculum served the school systems in many ways during the school year, 1964-65. The work performed may be grouped into several main areas: (1) Work on curriculum development for individual schools and county-wide programs; (2) direction in the operation of the State Curriculum Center; (3) inservice education; (4) special institutes and conferences; (5) school evaluation programs.

Curriculum Development

Requests came from a number of county supervisors and school principals for service all over the State. Many days were spent in the field. The time was utilized in helping to plan cur-

riculum workshops and conferences, evaluating curriculum materials for use in the various subject areas and participating in the actual conduct of the sessions. A curriculum supervisor served as consultant in many situations and in others assisted in securing out-of-state consultants for specific purposes on the programs. Assistance was given school faculties in Calvert, Cecil, Charles, Dorchester, and Talbot counties in developing subject outlines for the various subjects.

One of the Supervisors served on a committee to work out State plans for the amended NDEA Title III Act. She was partially responsible for approving local projects in history, geography, and civics. Major goals and specific activities were worked out for the improvement of instruction in history, geography, and civics for the oncoming year.

State Curriculum Center

A three-day Annual Audiovisual Preview for the evaluation of films, filmstrips, and recordings was held. Representatives from the counties and Baltimore City and the teacher education institutions in Maryland attended. By means of this cooperative evaluation, materials were purchased for the Curriculum Center.

All of the curriculum materials sent to the Department were evaluated before being forwarded to the Curriculum Center.

The following lists and/or publications were prepared:

1. The 1964 Supplement to the 1961 Audiovisual Catalog. This gives an annotated description of materials purchased for the Center.
2. "Printed Curriculum Materials, 1965," the first supplement to "Printed Curriculum Materials, 1955-1962." This list contains the bulletins and yearbooks produced by school systems, state departments of education, colleges, and agencies in Maryland and in other states.
3. The educational level and prices of curriculum materials which had been produced by the local school systems during the year ending May 31, 1965.
4. New audiovisual materials obtained in 1965 for the State Curriculum Center.

Training For Professional Growth

Assistance was given in directing programs for the inservice education of principals, teachers, and other local staff members, the central purpose being to improve instruction. These meetings were marked by their variety and number during the year. Aid was given in securing speakers and also in helping with the demonstration lessons. In many cases help was given individual school faculties in their efforts to upgrade instruc-

tion. Here community resource people and people from the State colleges, NEA, and the United States Office of Education were called upon.

Special Institutes

One of the supervisors worked with several local groups and State colleges in planning and conducting institutes for teachers. They include the Southern Maryland Reading Council and Anne Arundel County Reading Council. Each of these groups conducted several special institutes. The supervisor also served at Morgan State College in the regular summer science workshop and the NSF Institute. Several days were spent working with the training school staff at Montrose School, Boys' Village School, and the Education Department at Patuxent Institute.

The State Coordinating Curriculum Committee was chaired by one of the curriculum supervisors. The Committee met to evaluate instructional materials for the 1965 List I and List II and to discuss policies for their distribution. Following their printing, the Lists and the Annotated List of New Materials were sent to the local school systems, colleges, and public libraries in Maryland.

Work was continued with *The Baltimore Sunpapers* in supplying the twenty-three county boards of education with free monthly prints of the news film "Screen News Digest"; also work continued with the *Baltimore News American* which supplies the junior and senior high schools of Anne Arundel, Baltimore, Harford, Howard Counties and Baltimore City with free monthly current affairs filmstrips.

Assistance was given to the Music Committee in planning the Maryland Conference of Supervisors of Music held April 7, 1965, at the Emerson Hotel, Baltimore.

School Evaluation

School evaluation was given serious concern in a number of high and elementary schools during the year. The supervisor worked with high schools in Calvert, St. Mary's, Talbot, and Worcester counties. These schools were preparing for evaluation by the Middle States Association of Colleges and Secondary Schools. The supervisor worked throughout the year with other types of less formalized evaluation. The Boston Elementary Evaluative Criteria were used in evaluation programs in Calvert, Cecil, Charles, and Somerset counties. Schools were visited in these counties by State-wide committees according to a plan similar to that used by the Middle States Association.

HEALTH AND PHYSICAL EDUCATION

School Health Program

The Supervisor of Physical Education and Recreation served with Dr. John L. Pitts of the Maryland State Department of Health as co-chairmen of the Maryland State School Health Council. Two important actions taken by the Council were: 1) to restructure the Council to insure maximum effectiveness in achieving participation of and coordination between health and education departments and 2) to assure that Dr. Gilbert Schiffman's Committee on Early Identification of Readng Problems would not be dissolved until a set of bylaws for the Council had been formulated by a study Committee and presented to the Council. The co-chairmen were authorized to establish an interdisciplinary committee for this task.

On behalf of the Council the co-chairmen appointed an interdisciplinary committee to study the joint role and responsibilities of health and education departments in combating health hazards of cigarette smoking as reported by the Surgeon General. When the committee assembled, it designated itself as the Maryland Committee on Smoking and Health with Dr. Kay Edwards, Chief, Division of Adult Health Services, Maryland State Department of Health, as Chairman. The Committee decided that its first effort should be concentrated on children in grades 5 and 6. A resource teaching unit was developed by a subcommittee and a packet of materials was assembled for distribution to schools in Maryland. The State voluntary health agencies gave much assistance in providing the materials for the kit. A Statewide Conference on Smoking and Health was planned by the Committee to be sponsored jointly by the Departments of Health and Education and the three voluntary health agencies. About 100 people attended the Conference. Informed speakers motivated them to conduct effective educational programs for 5th and 6th graders, emphasizing health hazards of cigarette smoking. About 3,000 educational kits were distributed for local use.

In keeping with repeated recommendations of the Council, the State Department of Education stressed the importance of upgrading programs in health education. As a result of a meeting early in the school year, it was decided that at both the annual Maryland Conference on Secondary Education and the Maryland Conference on Elementary Education, special attention would be given to the urgency for school instructional programs designed to meet physical and mental health problems. At the Conference on Secondary Education, Dr. George James, Commissioner of Health for New York City, spoke on "Health for Youth of Today and Tomorrow."

School Physical Education Programs

The Supervisor of Physical Education and Recreation was invited to participate in workshops and conferences in nine counties and to talk to administration classes at the University of Maryland, Morgan State College, and Coppin State College.

The Maryland Association for Health, Physical Education, and Recreation held an all-day conference at Dulaney Senior High School during the Maryland State Teachers Association Convention. Approximately 1,100 teachers and administrators were in attendance. The Association also held a conference at Annapolis in which the Delaware and the Washington, D.C., health, physical education, and recreation associations cooperated and participated. This "Tri-State Conference" will be repeated annually in the future, and the site will be alternated in the three geographical areas.

Gymnastics continued to receive more and more interest and have become a large part of the physical education program during the winter months. Counties and groups of counties are continuing to sponsor clinics for the teachers to improve their skills in teaching gymnastics.

Physical Fitness

The AAHPER Youth Fitness Test, which consists of seven items, was again administered to 5th, 8th, and 11th graders in all school sysems, including Baltimore City. Excellent response was received, reflecting a sincere interest by parents in the physical fitness of their children. The Physical Fitness Report to Parents, which is a form sent to parents after the test is administered to the child, proved very successful as a technique in gaining parents' interest.

New Market Elementary School in Frederick County was established as an official Demonstration Center under the State Department of Education and the President's Council on Physical Fitness. The school received visitors from in and out of State to observe the operation of the model program.

Maryland Public Secondary Schools Athletic Association

The State Supervisor is responsible for the administration of the MPSSAA. The 1964 State Cross Country Meet was held for the first time at Western Maryland College where approximately 750 boys competed in 8 different races over a 2½ mile course on the campus. A District Soccer Tournament was held in each of the five districts of the Association.

State-wide clinics for wrestling coaches and cheerleaders were also sponsored by the Association in the fall of 1964 as well as a clinic for football coaches in the spring of 1965.

In the spring of 1965, 17 District Meets were sponsored at which boys qualified to participate at the State level. The State Meets were organized for Class AA and A schools to participate in one, and Class B and C schools in another. Both were held on the same day. However, a new trend seems to be emerging for each class of school to have a separate State Meet. Plans are to attempt to do this, possibly in 1966.

School Outdoor Education Programs

Carroll and Cecil county school systems launched outdoor education programs for 6th graders. Carroll County's program is conducted in a camp situation five days a week. The Cecil County program is of the nonresident type in which the children are taken on one-day field trips over a period of six consecutive weeks. Instruction is given in 12 different subject areas.

It is estimated that a total of 5,118 elementary school pupils experienced outdoor education in resident camp sites. Involved with the programs were 190 classroom teachers and 365 high school students who served as counselors. While growth in outdoor education has been encouraging, there are still many children who are not receiving much association with the great outdoors. Not all outdoor education need be associated with camp locations. Field trips of short duration are being taken in many parts of the State, and this means of learning can and should be extended considerably. It is hoped that school systems will take opportunities provided through Title I of the Elementary and Secondary Education Act of 1965 either to inaugurate or extend their outdoor education programs.

State and National Groups and Conferences

In addition to his regular professional duties, the State Supervisor of Physical Education and Recreation served in the capacity of Past-President of the Society of State Directors of Health, Physical Education and Recreation, and also on the Society's Committee on Legsilation to bring about desirable consideration and inclusion of health, physical education, and recreation areas to benefit from the various titles of the Elementary and Secondary Education Act of 1965.

He also served as liaison person between the State Department of Education and the Maryland Commission on Physical Fitness, as a member, starting a three-year term; on the Baltimore County Health and Welfare Council; on the Governor's Maryland Committee on Firearms Safety to make recommendations to the State Legislature; and on the Metropolitan Y.M.C.A. Camps Committee.

FOREIGN LANGUAGES

During the school year 1964-65 the State Supervisor of Foreign Languages working under Title III of the National Defense Education Act continued administration of the equipment acquisition program and supervision in the area of modern foreign languages.

Assistance was provided to local school systems in the development of projects requesting language laboratory equipment and supplementary teaching aids. These projects were then evaluated and processed at the State level to insure effective use of federal matching funds.

Throughout the year supervisory and consultant services were available to local school systems. Continuous contact was maintained with them and visits provided opportunities for conferences, planning sessions, and participation in activities directed toward the improvement of modern foreign language education.

State-local sponsored workshops and inservice programs helped teachers become more familiar with new content and methods in teaching modern foreign languages and with opportunities for participation in NDEA Foreign Language Institutes. The State Supervisor participated in many meetings held by the local school systems.

State services included a two-week workshop to train new secondary school teachers, a two-week workshop to train specialists for TV follow-up, and a four-week production workshop to revise and expand a former State bulletin, *Selected Filmed Materials for French, Spanish,* and *German Classes.*

The State Supervisor aided two counties in planning for a six-week and a four-and-one-half week curriculum workshop in which she also furnished consultant help.

Several conferences of all the foreign language supervisors in the State were held to share ideas and to plan specific ways in which the Maryland State Department of Education could best help local foreign language instruction. The supervisor also continued to work with the State colleges and universities on common language problems.

The State Supervisor of Foreign Languages has also been actively engaged in regional and national programs concerned with improving modern foreign language education. She has worked with the Modern Language Association, serving as a member of a team which evaluated NDEA Summer Language Institutes, lectured at the University of Maine, was a speaker at the American Association of Teachers of German, participated on the panel, "Meet the Experts," for the American Association of School Administrators, served as chairman for a general

session at the Southern Conference on the Teaching of Foreign Languages, and was consultant for secondary school teachers of French at the Southern Conference. The Supervisor served with two colleagues in evaluating the Indiana Language Program for the Ford Foundation.

The Supervisor serves as a member of a National Advisory Board of the Modern Language Program (*Parlons Français*), is active in the Northeast Conference on the Teaching of Foreign Languages, is a member of the National Council of State Supervisors of Foreign Languages, and continues to serve as chairman of the Interim Board of Directors of the Department of Foreign Languages of the National Education Association. The State Supervisor also serves as an ex officio member of the executive committee of the Maryland Modern Language Association and she edits the *Maryland Newsletter*.

MATHEMATICS

Much of the first year of the newly created position of Supervisor of Mathematics was occupied with the task of becoming familiar with the job and the ongoing activities. Prior to this school year, the State Supervisor of High Schools was responsible for both science and mathematics. He had begun many activities which were to be continued by the new Supervisor.

Services to the State Agency

As a result of the expanded NDEA Title III program, the State Department of Education completely revised all standards and developed new guidelines. The State Supervisor of Mathematics developed the standards for the mathematics program and assisted with the development of standards in the five new critical subject areas.

Consultant services were rendered to other members of the State Department of Education upon request. In this capacity a visit was made to the Maryland Training School to consult with the mathematics department and visits were made in cooperation with the State supervisors of elementary schools.

Services to the Local Schools

The program of service which was already under way through the leadership of the State Supervisor of Science and Mathematics was continued by the new State Supervisor of Mathematics. Visitations and conferences were frequent throughout the year. Special attention was given to evaluating existing mathematics programs, planning new programs, and providing needed inservice opportunities for teachers.

The *Maryland Science and Mathematics Newsletter* was continued on a monthly basis in cooperation with the State Supervisor of Science.

In addition to working with local school systems in planning inservice activities, the State Supervisor conducted a number of inservice programs personally. This permitted increased familiarity with local problems for the supervisor while providing a needed service for local schools.

He also consulted with local systems on planning projects for acquisition of equipment and materials. Numerous other activities were carried on at the request of local personnel in an effort to improve continually the nature and quality of mathematics education.

General Professional Services

A very important part of the supervisory program involved continuing cooperation with a vital new organization in Maryland. The Maryland School-College Mathematics Association is striving to implement recommendations of the Committee on Undergraduate Preparation in Mathematics for the training of teachers of mathematics. It is also seeking better relations between the colleges and the public schools. The State Supervisor of Mathematics is an active member of this association.

The Supervisor has sought the cooperation of the Maryland Academy of Sciences to provide sessions for mathematics teachers with professional mathematicians and others in related professions.

There has been continually increased cooperation between the University of Maryland Mathematics Project personnel and the State Supervisor.

The University of Maryland has been conducting summer institutes in mathematics through the National Science Foundation for a number of years. During 1964-65, the State Supervisor of Mathematics was asked for suggestions regarding the nature of these institutes and for assistance in selecting participants from among the Maryland applicants.

SCIENCE

The State Supervisor of High Schools, with responsibilities for science and the administration of Title III of the National Defense Act, developed programs and provided services in the following general areas during the 1964-65 school year: Title III National Defense Education Act administrative activities; State and regional activities in science; activities in science for all local school systems; special programs in science for local school systems; and work with other agencies in science.

Title III NDEA Administrative Activities

General management and control were maintained over the processing of projects for the acquisition of equipment and ma-

terials by local school systems and for the allocation and reallocation of funds in this program. In accordance with the expansion of the Title III program to include five additional subject areas, assistance was given in rewriting the Maryland State Plan, developing new guidelines, application forms and standards, and in arranging a State conference for presenting these materials to representatives of local school systems. To implement the Title III program, continuous contacts were maintained with local school systems and the U.S. Office of Education.

State and Regional Activities in Science

Conferences were arranged for supervisory personnel with responsibilities in science at elementary and secondary levels. Emphasis was placed upon keeping local supervisory personnel appraised of new trends and developments in science education. Regional conferences were arranged with local school systems to provide such services as: clinics in special aspects of the laboratory approach to science teaching; inservice training for elementary science teachers via television; visitation programs for biology teachers to see new teaching procedures; and a special, regional conference emphasizing new developments in chemistry education.

Activities in Science for All Local School Systems

The program for maintaining contact and providing leadership for all local school systems was continued. Visitations and conferences with local school personnel were continuous throughout the year. Emphasis was placed upon the evaluation of existing science programs; development of new programs; and concern with inservice programs, curriculum development, improved teaching procedures, and the planning of new and improved science facilities. The *Maryland Science and Mathematics Newsletter* was continued on a monthly basis to keep personnel in local school systems informed of ideas and developments. Special mailings provided still further opportunities to supply local personnel with pertinent writings and viewpoints on science education.

Special Programs in Science for Local School Systems

When possible, in accord with local programs and needs, special programs were initiated and promoted. Such programs included: the development of conceptually-oriented elementary science programs in Howard and Allegany counties; assistance to a geology program in Baltimore City; improvement of junior high science throughout the state; and assistance to the general physical science program in Baltimore County.

Work With Other Agencies in Science

Opportunities to work with other agencies and groups interested in science education were continued. Principally among these was the Maryland Academy of Sciences which cooperated with the State Department in such programs as "Sessions with Scientists" and the "Junior Science and Humanities Symposium." Other cooperating groups included the Chesapeake and Potomac Telephone Company, The University of Maryland Science Teaching Center, the Maryland Association of Science Teachers, and the Maryland Association of Biology Teachers. Maryland was represented in the National Youth Science Camp sponsored by the State of West Virginia.

PUPIL PERSONNEL AND GUIDANCE SERVICES

During the year 1964-65 there was rapid development and expansion of the entire program of pupil services throughout the State. Of particular significance was the program in which Anne Arundel County provided supervisory leadership and financial resources in cooperation with the State Department of Education and the University of Maryland for participation in a research project in elementary schools planned by the Interprofessional Research Commission on Pupil Personnel Services. This project had as one of its purposes the establishment of a sound base for decision concerning the most appropriate approach to the provision of pupil services at the elementary school level.

State Department studies on pupil services were completed with receipt of the study by Dr. Helen-Louise Scarborough titled "The Role of the School Specialist in Interaction with Community and School Functionaries."

This Department, through the work of the supervisor of pupil services, cooperated with other state departments and community groups in making available to Maryland students many different resources in the field of pupil services. Examples of such cooperative effort were:

1. The Career Opportunities Exposition sponsored by the Baltimore Junior Association of Commerce
2. In-service workshop sponsored by the Department of Parole and Probation
3. Seminar for counselors sponsored by Westinghouse Electric Corporation
4. Workshop for guidance supervisors sponsored by the Department of Agriculture, University of Maryland
5. Participation in the workshop of the Maryland Advisory Council on Child Welfare
6. Participation in the work of the High School College Council

Maryland personnel provided leadership in the convention of the International Association of Pupil Personnel Workers which was held in Baltimore October 25-29, 1964.

In-service programs for personnel in pupil services included regional conferences for counselors in Calvert, Caroline, Cecil, Charles, Dorchester, St. Mary's and Talbot counties and for pupil personnel workers in the Southern Maryland and Eastern Shore counties. State-wide meetings were planned for guidance supervisors, school psychologists, pupil personnel supervisors, and visiting teachers.

A State-wide committee on pupil services met regularly during this year to study programs of pupil services preparatory to writing a policy statement in this area of the educational program.

SPECIAL EDUCATION

Significant developments in Special Education during 1964-65 included processing applications for traineeships and fellowships under Public Law 85-926 as amended by Public Law 88-164. Provision is made under these laws, for financial assistance to teachers in all areas of exceptionality who pursue further training on either a full-time basis or during summer sessions.

A research project on "Educational Programming in Simulated Environments for Seriously Emotionally Handicapped Elementary School Children" was started in order to:

1. Determine the incidence of seriously emotionally handicapped third-grade pupils in a selected population in Maryland and to analyze this incidence in relation to the numbers found in other studies.

2. Determine whether or not the simulated environments technique of instruction brings about greater gains in measures of behavior and measures of academic achievement than assignment in conventional classes.

3. Determine which of the two methods of providing simulated environments instruction is superior: small size special classes consisting of emotionally handicapped pupils only; or, regular size classes with a small number of emotionally handicapped pupils in each class. This project was made possible through a federal grant under the Provisions of Title III, Section 302, of Public Law 88-164.

The supervisors of special education worked with personnel at the State hospital who were responsible for their educational programs. New school programs were initiated at Spring Grove State Hospital and at Springfield State Hospital.

Research projects were started in the school programs of three of the hospitals, major emphasis being placed on the one at Rosewood where they are using the Initial Teaching Alphabet with retarded children.

The supervisors planned for and worked with personnel from Towson State College on a three-week workshop for teachers of the educable mentally retarded, trainable mentally retarded, emotionally handicapped, and speech handicapped. They planned and conducted the annual State-wide conference of speech and hearing therapists and the annual State-wide conference of supervisors and administrators of Special Education. The supervisors also visited special education classes in both public and nonpublic schools to evaluate programs, facilities, and equipment. They worked with a State committee on curriculum development for the retarded and served as consultants to local colleges and school systems in planning programs and in-service workshops.

DIVISION OF CERTIFICATION AND ACCREDITATION

The services of the Division of Certification and Accreditation for the year 1964-65 may be reported generally under six broad headings:

1. Certification of teachers
2. Accreditation of institutions of higher learning
3. Accreditation of nonpublic elementary and secondary schools
4. Accreditation of nonpublic specialized schools
5. Teacher education programs
6. High school equivalence certificates

CERTIFICATION OF TEACHERS

After working for several years with new requirements for certificates adopted in May, 1961, and November, 1962, it became apparent that some revisions were necessary to update the requirements and remove some of the operational flaws. During the year 1964-65, a committee of personnel directors from the counties worked with the Supervisor of Certification and members of the Department staff to make the necessary adjustments. The report of this committee was completed and prepared for presentation to the State Board of Education for appropriate action.

There were 5,179 new teachers and principals employed in the Maryland county schools during the year, of whom 2,963 or 57 per cent received regular certificates. This reflects a three percent reduction from 1963-64 in the percentage of new teach-

ers and principals who received regular certificates. Of those not regularly certificated, 74 percent held college degrees, showing a decline of five percent from 1963-64 in the number of teachers employed on substandard certificates who have completed work for the basic degree. Many of these teachers lack only six semester hours of recent college credit or one or two of the specifically required professional courses.

For the year 1964-65, 43 noncitizen teaching permits were issued, of which 12 were equivalent to a regular certificate.

Over 12,000 new certificates were issued during the school year 1964-65. These certificates include, in addition to those issued to teachers in new positions, renewals, changes of county, changes in teaching assignments, and teachers in private schools and State institutions.

The increase in the volume of applications for evaluation necessitated the addition of another counselor in certification who was assigned full time to the evaluation of private school records.

ACCREDITATION OF INSTITUTIONS OF HIGHER LEARNING

During the academic year no new community college programs were given official approval to operate in the State. However, all of these institutions previously established continued to show increases in enrollment and other indications of developing strength as colleges of the State. One of these institutions received accreditation during the year by the Middle States Association of Colleges and Secondary Schools. Members of the Division continued to serve on various committees of the Middle States Association of Colleges and Secondary Schools and assisted in the evaluation of college level programs. These evaluations have resulted in the accreditation of one new institution and a reaffirmation of accreditation of three other collegiate institutions of the State.

One or more members of the Division staff attended meetings of the Advisory Council to the State Committee for Higher Education on the Higher Education Facilities Act. Four such meetings were held during the year. A member of the staff served as secretary to the Maryland State Committee on Fulbright Scholarships which met on November 24, 1964, to select a panel of candidates for awards of Fulbright Scholarships.

The Commission for the Expansion of Public Higher Education in Maryland concluded its considerations during the year. A member of the staff continued to serve in the capacity of secretary to this Commission.

A list of State-approved colleges and universities was continued as a publication of the Department. The publication listed 17 two-year colleges, 29 four-year colleges and universities, 20 schools of nursing, 21 institutions approved for teacher education, and 9 professional schools.

The staff of the Division organized evaluation teams to make reports and presented recommendations to the State Board of Education on the following collegiate programs:

a. Two private junior colleges authorized to grant an Associate in Arts degree
b. One private college authorized to grant a Bachelor of Science degree
c. One public college authorized to grant a Master's degree
d. One public college authorized to grant a Bachelor of Arts degree in specific fields.

Among the national and regional conventions at which the Department was represented by staff members were the following:

American Association of Junior Colleges

American Council on Education

Middle States Association of Colleges and Secondary Schools

National Conference on Teacher Education and Professional Standards

National Association of State Directors of Teacher Education and Certification

American Association of Colleges of Teacher Education

During the academic year, one of the staff members attended one or more meetings of school officials and citizens of local units of the State expressing interest in the establishment of a community college. In all, some five local units expressed interest in the establishment of one or more community colleges in their areas.

Colleges, universities, and hospitals continued to show interest in approval for the education of veterans and war orphans. All accredited colleges in the State and 20 hospitals and schools of nursing requested and received this type of approval.

ACCREDITATION OF NONPUBLIC ELEMENTARY AND SECONDARY SCHOOLS

The number and kinds of nonpublic academic schools below college level which were operating in the State in 1964-65 and which have been approved by the Department were as follows:

Type of School	*Number*
Secondary schools	77
Tutoring	8
Nursery school (only)	33
Kindergarten (only)	31
Combination of nursery school and kindergarten	16
Preschool through elementary	25
Elementary (only)	9
Elementary through secondary	7
Preschool through secondary	2
Special	30
Total	230

There continues to be a need for a better way of informing the public of the existing law which requires approval of nonpublic schools by the State Superintendent of Schools. Throughout the State there continue to be individuals or organizations that accept the responsibility for care and/or education of children in such a way that no existing laws apply to them insofar as the enforcement of standards of child care and/or education are concerned. The regulations for the licensing of day-care centers under the auspices of the State Department of Health should help to remedy this situation. With continued close cooperation from the State Departments of Health, Welfare, and Education, it is hoped progress can be made in this area. During the year, an additional staff member in the area of approval of nonpublic elementary schools was employed. With this additional professional assistance, it is hoped that much more thorough coverage of the State can be provided.

Nonpublic Nursery Schools, Kindergartens, Elementary Schools, and Special Schools

These schools operated during 1964-65 in the following ways:

Cooperatives with parents participating	29
Cooperatives administered by parents who do not participate daily	3
Smaller centers (Proprietary—3 groups or less)	34
Larger centers (Proprietary—4 groups or more)	15
Schools—governed by board of directors	32
Church-sponsored centers	23
Others (sponsored by housing projects, civic groups, colleges, etc.)	17
Total	153

Of this total, 54 schools have indicated on the 1964-65 annual report that the school is incorporated as nonprofit.

Special Programs — Day Care

During the 1964-65 school year there were 22 centers offering day-nursery or extended day-care programs as a part of the whole program. In 10 of these centers the entire program was originally approved when the Maryland nonpublic school law, Section 25 of Article 77 of the Annotated Code of Maryland, became effective in 1948. The education programs in 9 of the remaining 12 centers were approved prior to 1964-65; approval was granted during the current year for the 3 other centers where day care is provided in addition to the nursery school and/or kindergarten programs.

Annual report figures indicate that there are 512 preschool-age children enrolled for the full day at centers which provide day-nursery or extended day-care programs. There are also 463 children attending half-day sessions at these centers.

Nonpublic Special Schools

There were 30 so-called special schools, 28 of them offering programs for handicapped, 7 of which were boarding schools. Programs are set up specifically for retarded at 11 centers; for emotionally disturbed at 8; disorders of central nervous system at 1; cerebral palsied at 2; blind at 1; communicative disorders at 2; and, for multihandicaps at 3. Six of these centers are for preschool-age children. Children at any of these centers may have multiple handicaps.

Of these 28 centers for handicapped children, 10 are church sponsored; 15 are now directed by a Board; 1 is partially supported by State appropriations and 2 are privately owned. Of the total 1,429 children enrolled in these special schools, 235 have been placed in centers for the emotionally disturbed.

ACCREDITATION OF NONPUBLIC SPECIALIZED SCHOOLS

During the academic year 1964-65, twenty-five specialized or trade and technical schools applied for and received certificates of approval from the State Superintendent of Schools under Section 25, Article 77, of the Annotated Code of Maryland. Eleven certificates were either revoked or returned when the schools to which they were issued ceased to operate. During the year 175 solicitors' permits were issued to out-of-state schools, some of which were correspondence schools while others provide a residential program. These solicitors represent schools in a number of states, some of which are located west of the Mississippi River.

In connection with the licensing of solicitors and salesmen for out-of-state schools, approximately 100 applications for permits were received and denied on the basis of improper business procedures, questionable advertising, enrollment contracts which

did not provide adequate protection to the enrollee, and courses of study which did not provide instruction as indicated by the title or advertising. Due to the nature of this type of school, several hundred complaints were investigated. A number involved contacts with the Federal Trade Commission and the United States postal authorities.

The most difficult problem encountered during this period involved the evaluation and approval of data processing schools. Due to the demand for individuals trained in this area and the infancy and rapid development of this training, it was almost impossible to establish acceptable standards. A number of attempts were made to obtain information from companies producing this equipment and professional associations in this field in order to define acceptable training. However, since opinions and advice received were frequently in variance, no attempt was made to write specific standards for approval of this type of instruction at this time.

Contacts and exchange of information between this Department and various State and federal government agencies as well as nonpublic associations and organizations continued to be an important function of the staff assigned to this program. During the year, 31 schools were given tentative approval or were continued in this basis pending improvements of programs, staff, or curriculum. In addition, approximately 150 applications and inquiries were received and processed which were not finally approved because of loss of interest or change of plans on the part of the applicant.

One of the most significant problems in the nonpublic school field during this period was the financial failure of several schools. In each case, the school was taken over by new financial interest with no monetary loss to the student enrolled. However, this situation points to a need for more adequate protection to the individuals enrolled in these schools. This protection might be provided in the form of performance bonds to be furnished by the schools.

Between July 1, 1964, and June 30, 1965, approximately 33,000 students attended nonpublic specialized resident schools in Maryland. Over 1,000 teachers were employed in approximately 300 approved and tentatively approved specialized school programs.

TEACHER EDUCATION PROGRAMS

During the academic year the publication entitled "State Approved Teacher Education Programs in Maryland Colleges and Universities" was continued. This publication provides detailed information as to each program in teacher education in each of the various colleges of the State. Among other activities of staff members in the academic year was the publication of a

pamphlet, "Suggestions for Increasing the Supply of Teachers." The organization of an Advisory Committee on Teacher Education Programs came into being, the purpose of which is to explore program needs and make suggestions for State-wide action. The bulletin, "Teacher Preparation in Maryland—A Quantitative Survey" was updated. Two documents were produced: "Projections of Teacher Supply and Demand in Maryland, 1965-1970" and "Student Teaching in Maryland." Initial steps were taken to develop standards for the evaluation of teacher education programs in Maryland, with the cooperation and assistance of representatives of the colleges of the State which have programs for the preparation of teachers. Two colleges within the past year have requested permission to develop new programs in teacher education. One of the four-year institutions which had previously prepared secondary teachers now wishes to prepare elementary teachers. This program has been given tentative approval to begin operation in September, 1966.

The second institution has operated many years as a college and has applied for permission to initiate a program for the preparation of secondary school teachers. This new activity has been tentatively approved for initiation with the entering class of 1967.

HIGH SCHOOL EQUIVALENCE CERTIFICATES

Each year the high school equivalence program attracts a greater number of applicants, especially for reexamination. Of the 4,097 persons who applied during 1964-65, 1,167 were asking for retest and 2,719 were new applicants. Not all completed the examination, however, and less than half of those who persevered earned the certificate. There has been a slight decrease each year since 1957-58 in the percentage of successful candidates. Previously, about two-thirds of the applicants passed the test the first time, and more than a third of the repeaters were successful. This year, only slightly more than half of the first-time applicants and about twenty-eight per cent of the repeaters qualified for the certificate. As indicated in the table elsewhere in this report, 3,274 candidates completed the examination, of whom 1,437 received the certificate. These figures include 388 applicants tested at correctional institutions in the State, 109 of whom received the certificate. In addition, 672 applicants who previously had completed the test through the United States Armed Forces Institute were awarded the certificate.

The total number of certificates issued since the program was established in 1941 is 31,784.

DIVISION OF LIBRARY EXTENSION

Increased demands made by citizens and students on libraries, both public and school, have increased public interest in the

need to accelerate the pace of library growth and improvement to meet these demands. The Division of Library Extension has worked actively during the year to gather and to publicize data on the status of libraries and on library needs and to develop standards and plans for library improvement. In addition, new and enlarged patterns of cooperation were developed among public libraries, and the services of the State to libraries were expanded. Most of these additional services were made possible through the availability of increased federal funds for public library development. The programs are described in the public libraries section of this report.

A Citizens' Conference on Libraries, held in March, 1965, was attended by more than three hundred citizens, trustees, government officials and librarians in the State. The program emphasized the needs and services of public, school, and college libraries.

In 1964, the Maryland General Assembly appropriated funds for the inauguration of a graduate school of library science at the University of Maryland. This program will begin in the fall of 1965 and will provide the first opportunity in the State for a full program of professional library education. The lack of an adequate supply of professional personnel has been one of the major weaknesses in the libraries of the State. The new program will be a significant contribution to library improvement.

In cooperation with the Maryland Library Association and the Department of Correction, the Division participated in a survey of library needs in the adult correctional institutions of the State. The report, a Survey of Maryland Adult Correctional Institution Libraries, provides a five-year plan for the development of library service in these institutions.

An Advisory Committee on Library Services for Columbia, the planned community in Howard County, was formed at the request of the Howard County Board of Library Trustees. Under the chairmanship of the Director of the Divison of Library Extension, the committee has secured the financial support of the Council on Library Resources to provide a consultant team of public school and educational media specialists to conduct a study and make recommendations for total library services in Columbia. The report will be available in the fall of 1965.

PUBLIC LIBRARIES

Cooperative Programs

Highlights in public library development were in strengthening existing and initiating new patterns of cooperative use of all public libraries in an area, and in expanding the books collections and other resources of the major libraries in these areas. The cooperative projects are aimed at increasing the quantity

and variety of library materials easily available to all people in the State in response to increased demands.

Metropolitan Maryland Library Service was inaugurated by the public library systems of Baltimore City, Baltimore, Anne Arundel, Carroll, Harford, Howard, Montgomery, and Prince George's counties. Under this arrangement adult library card holders in any of these libraries may borrow and make use of the resources of all the other cooperating libraries without fee. Library users may use the library nearest their home or work, or those which provide the specialized materials needed for serious study or research.

The Eastern Shore Area Library, established in 1965, is an outgrowth and consolidation of the Lower Shore Area Library and the Eastern Shore Adult Services Project which began in the early 1960's. The Area Library, located as a part of the Wicomico County Library in Salisbury with a special fiction collection in the Talbot County Library in Easton, provides reference and library loans to the other libraries, traveling collections of specialized books and recordings, and channels unfilled requests to Enoch Pratt Free Library for loan. It also provides consultant services to other libraries, prepares exhibits, news releases, information bulletins, and plans and conducts in-service workshops and conferences. Library borrowers from any county on the Shore may also borrow books directly from the Area Library or from any other cooperating library free of charge.

The Eastern Shore Processing Center expanded its volume of service and its coverage of libraries. Contractual arrangements were made with the Delaware State Library Commission to order and process books for the Commission and for ten public libraries in Delaware. Seventeen Maryland county public library systems were served. In 1964-65, the Center processed 82,520 books, an increase of 29,308 over the previous year.

The Southern Maryland Regional Library Association organized in 1958, began to implement plans for establishing central reference services, expanding the jointly-owned collections, and setting up new professional positions for supervision and administration. Lack of availability of professional personnel has delayed the development of other programs.

State Services

The following new activities resulted in improved State services and resources to public libraries:

Teletype Service—As an extension and improvement in the supplementary loan service provided by the Enoch Pratt Free Library through contract with the State Department of Education, plans were under way to install teletype communication between the Enoch Pratt and the headquarters of each county pub-

lic library in the State. This service will provide rapid answering of reference questions and cut in half the time now necessary for mail delivery of loan requests to Pratt. In effect, it provides instant access from anywhere in the State to the Pratt collection and services.

Library Education—In order to encourage the addition of professional library personnel and to provide for training of interested persons, the Division of Library Extension set up a program of scholarship grants to the public libraries to provide for one year of graduate library education for a present or potential staff member of each library system. Library Services and Construction Act funds are being used for this program.

Other in-service education programs included workshops for librarians and trustees and a continuation to the central part of the State of the intensive in-service education program begun in 1964. In addition, the State provided funds to librarians and trustees to cover expenses of attendance at approved out-of-State institutes and workshops. Twelve trustees attended an institute, held in Detroit, on planning for public library buildings.

The Division purchased and distributed two book lists: *Novels with a Flavor* and *Politics, 1964*. These lists, available through libraries to all persons in the State, are designed to call attention to significant books or books on issues of current concern or importance.

Book Grants — Financed with LSCA federal funds, this project provided grants to the smaller library systems with inadequate book collections to focus on the acquisition of substantial works in defined subject areas in order to build collections of substance and quality. Eighteen libraries participated in the project.

Grants and Assistance in Studies and Surveys—Assistance was provided to libraries to develop plans for needed studies of local library problems, and grants were made for consultants to make the approved studies. Several studies were made in the area of building needs, two in personnel and organization, one in long-range plans for library development.

Through the contract with the Enoch Pratt Free Library, 27,866 books and 7,011 films were borrowed by the county libraries to fill reader requests for specialized materials.

Public Library Buildings

During the 1964-65 fiscal year, the passage of a federal bill and a Maryland State bill gave great impetus to construction of public library buildings. The Library Services and Construction Act of 1964 was signed by the President on September 19, 1964. Title II of this act provides federal financial assistance for the construction of new public library buildings and the initial equipment of such buildings.

The Anne Arundel County Library, with building plans completed and ready for filing, received early approval and was the recipient of the first federal grant in the nation awarded under this bill. In addition to Anne Arundel, five other counties and Baltimore City submitted approved projects and qualified for funds available to Maryland. Maryland's initial allocation was $519,710; later a reallocation gave Maryland an additional $94,804, making a total of $614,514.

The State Public Library Incentive Law for buildings became effective in July, 1964. This law provides matching State aid to the counties and Baltimore City to finance debt service and/or pay-as-you-go capital outlay expenditures for the purchase of land, construction, remodeling, and furnishing of library buildings. According to the formula, the State's annual contribution is the difference between one-half cent on each one hundred dollars of assessed valuation of property and twenty-five cents per capita of the local unit population.

During the fiscal year, sixteen counties and Baltimore City qualified for funds under this act.

SCHOOL LIBRARIES

The 1962-63 State-wide survey of public school libraries was published in the fall of 1964. The United States Office of Education had conducted a similar nationwide survey of school libraries for the same school year. A comparison of the two studies shows that in a number of areas, Maryland school libraries are better than the national average:

	United States	*Maryland*
1. Percent of all public schools with centralized libraries	58.9	84.6
2. Percent of all pupils in public schools with centralized libraries	74.3	94.3
3. Percent of all school librarians with 15 to 16 semester hours in library science	78.1	80.7
4. Expenditure per pupil for library books	$2.28	$2.36
5. Percent of all public schools with centralized libraries served by librarians	68.1	61.5
6. Number of pupils per librarian, public schools with centralized libraries	932	1,384

The State-wide survey showed that the educational preparation of the school librarian compares favorably with that of teachers in the State:

	Teachers	*Librarians*
1. No degree	13.6%	6.6%
2. Bachelor's degree only	69.0%	64.2%
3. Master's degree	17.4%	29.2%

Efforts are continuing to relieve librarians of nonprofessional duties in order that their time may be used effectively with teachers and pupils. Baltimore City and Anne Arundel and Baltimore counties provide centralized ordering and processing of all books for the individual school libraries; Montgomery County provides the same services for nonprint materials as well as books; Frederick, Harford, and Howard counties provide centralized cataloging for new schools and certain selected existing ones; Prince George's County contracts with a commercial company to provide the services.

There is growing recognition of the fact that new schools need considerable additional funds for the establishment of libraries and that materials need to be selected and processed in advance of the opening of the school; this practice is apt to be more prevalent for secondary schools than for elementary ones.

As a result of being awarded a Knapp Grant, the library in the Mount Royal elementary school in Baltimore City has been serving as a demonstration and observation center for school administrators and librarians for the entire east coast.

The supervisor of school libraries in the Division of Library Extension continued to spend a little more than one-third of her time in the field. Her other activities included serving as a consultant to the U.S. Office of Education for the selection of NDEA school library institutes; a member of the advisory committee for the nationwide study of library services in schools for the deaf, of the advisory committee for the Mount Royal School Knapp Project, of the Wye Institute books awards committee; chairman of the Maryland Library Association program committee, and of the committee to select participants in the First Citizens' Conference on Libraries. She was a member of the State Department of Education's committee for preparing guidelines for the administration of the revised NDEA and has been assigned the responsibility of evaluating local NDEA plans and projects for A-V libraries. She also participated in workshops for the preparation of teachers who were to be engaged in the Head Start and Catch-up programs.

DIVISION OF VOCATIONAL EDUCATION

The program of vocational education in Maryland's public schools has continued to expand in size, in scope, and in intensity of activity during 1964-65. The economic growth rate in the State during this period has been one of the highest in the nation. This has provided a favorable climate for the concomitant growth of vocational education.

During the initial period of the implementation of the Vocational Education Act of 1963 the emphasis on vocational education in Maryland has been placed upon the following areas:

a. The development of a new State Plan for Vocational Education, which makes provisions for a total program of vocational education at all levels.
b. A program of information and education for local educational personnel and the general public concerning the total concept of vocational education.
c. The development of plans and procedures whereby vocational education can be made available to all people within the State.
d. The allocation of federal funds to the local educational agencies for the purchase of equipment in order to update and improve existing programs.
e. The allocation of State and federal funds for the construction and equipment of area vocational schools.
f. The encouragement of experimental programs designed to expand occupational education services at the high school level.
g. The strengthening of relationships with the Department of Employment Security as a means of determining the needs and fulfilling the demands of the labor market for competently trained workers.
h. Initiating and encouraging cooperative action wherever such action was called for to make maximum use of occupational training in dealing with unemployment and related social and economic problems.

Accomplishments of the Year

Maryland's accomplishments in the field of vocational education during 1964-65 were consistent with the attention and effort expended by State and local educational leaders while working cooperatively with representatives of industry, labor and management, local, State and federal governmental agencies as well as interested laymen.

Principal among the overall accomplishments which should be noted are those described below.

Enrollment

The enrollment figures for all areas and all levels of vocational education indicate that more than 326,000 persons in Maryland in 1964-65 received instructions in which occupational competence was the principal or a related purpose.

New Programs

In almost every occupational field, new curriculums, many with unique patterns of organization, were developed. Some of these programs were started during the school year, while others accepted students in the fall semester of the 1965 school year. Unique occupational preparation programs were planned to serve the developing businesses and industries of the State. For

the first time, attention was given to the development of instructional patterns for the so-called "unskilled" and "semiskilled" occupations. And, in addition, several realistic training experiences were devised for the seriously handicapped.

Additional Training Locations

Advances were made during the year in the planning and funding of vocational education programs in many local educational units previously unserved. Substantial extension of training opportunities to the rural and sometimes remote areas, coupled with the more routine expansion in the heavily populated sections of the State, accounted for much of the gain in training facilities.

Expanded Facilities

During 1964-65, five new area vocational school facilities were planned, and contracts were awarded for their construction. The addition of these facilities will increase the number of vocational education offerings by shops and laboratories.

The local educational unit that did not in 1964-65 add new facilities for vocational education, or modify existing facilities, was an exception. The trend toward augmentation of physical facilities was almost universal.

New Legislation

The General Assembly of Maryland, at its 1965 session, enacted legislation providing for financial support for the construction of area vocational schools. This support is provided through a $10 million bond issue and covers all projects initiated after December 1, 1964. The amount of financial assistance granted will be at least 50 percent of the total cost of the project including its initial and permanent equipment; the amount may exceed this percentage, dependent upon the amount of State aid already allotted under the minimum current expense program.

The General Assembly also: (1) made provision for the establishment of regional community colleges of two or more counties and provided $5 million for construction purposes, with the State bearing up to 75 percent of the total cost of such colleges. The colleges will offer vocational, technical, and semiprofessional programs and serve the more sparsely populated sections of the State; (2) provided $600,000 for matching purposes under MDTA for fiscal 1966, if needed; and (3) made mandatory the supply and use of protective eye devices for all persons participating in and/or visiting certain industrial arts, vocational education, and science laboratories.

The Bylaws for the implementation of each piece of legislation listed above were developed by members of the State staff with the help of local supervisory personnel.

Expansion of Vocational Education in the High Schools

One of the most promising developments has been a Statewide effort to realize the occupational training potential of the comprehensive high school. The cooperative efforts of the State Department Staff and the staff members of each of the local education units were significant in this connection. An effort to revitalize vocational education at this high school level, begun in the spring of 1964, produced measurable results in 1964-65. New and strengthened programs of vocational instruction emerged. The success of these programs has inspired additional attention to this part of the curriculum by members of school boards, administrative staffs, students, professional associations, and lay advisors.

Manpower Development and Training Act

Maryland continued to design and operate excellent training programs under the Manpower Development and Training Act. This legislation is aimed at training unemployed persons to enable them to become self-supporting citizens. Maryland's MDTA programs have been characterized by a 70 percent employment rate for those who have completed training courses. Ninety percent of those placed in employment after training were employed in the occupation for which training was received.

In 1964-65 Maryland conducted forty-eight projects under MDTA. During this period, thirty different training projects were developed for more than 1,600 trainees. Approximately 71 percent of the training was accomplished in public school facilities.

Among the interesting facts concerning the characteristics of trainees served by this program through June 30, 1965, are the following.

- 35 percent were female.
- 44 percent were high school graduates.
- 16 percent had been unemployed 1 year or more prior to entering training.
- 47 percent of the enrollees were classified as heads of households.

Teacher Recruitment and Certification

The new Maryland State Plan for Vocational Education contained several changes in certification requirements for vocational teachers as well as classifications of instructors which would be needed for the expanded purposes included under the Vocational Act of 1963. Certification requirments were reexamined, and new programs of pre-service and in-service teacher education were developed by State staff members, teacher edu-

cators, and representatives from local boards of education. Attention was given not only to new degree programs but also to immediate staffing needs. As a result, a special teacher education workshop was begun at the University of Maryland to provide teachers for a number of the local school districts.

State Advisory Council for Vocational Education

The Maryland State Board of Education, which also serves as the State Board of Vocational Education, acted upon the recommendation of the State Director of Vocational Education and appointed a State Advisory Council for Vocational Education in January, 1965. Meetings were held several times during the spring of 1965 at which time the committee gave detailed attention to a variety of existing and anticipated developments in the total program of vocational education.

Implementation of the Vocational Education Act of 1963

Without question, one of the most significant attainments in 1964-65 was the establishment of policies and procedures whereby the Vocational Education Act of 1963 (P.L. 88-210) might become immediately operative upon its funding by Congress. This procedure is commonly referred to as the development of the State Plan for Vocational Education.

Several conferences for school administrators and local supervisors were conducted by the State staff for the purpose of receiving advice and for explaining the purposes and implications of the new federal legislation. Ten State-wide advisory committees, a total of more than 50 persons, lay and professional, were involved in the determination of initial standards and procedures. A new State Plan was adopted by the State Board of Education and submitted to the U.S. Commissioner of Education. The Plan was accepted and approved as of November 27, 1964.

The staff at the State level developed forms and procedures for making application for anticipated funds. Local educational units all over the State became involved in analyzing and appraising their existing programs of vocational education and developing proposals for the improvement and expansion of such programs.

This effort so stimulated attention to the further development of vocational education that most local units were in a position to operate their upgraded or new vocational programs by the spring of 1965.

Staff Additions & Reorganization

The critical need for a staff organization of the Division of Vocational Education, in the State Department of Education,

that could match the insistent demand for leadership, direction, and coordination was recognized, and the 1964-65 budget permitted the additions of several new State staff members. Educational supervisors were added in Technical Education, Trade and Industrial Education, and MDTA during 1964-65.

At the local educational staff level in many of the local units, educational specialists in Vocational Education have been appointed to staff positions.

DIVISION OF ADMINISTRATION AND FINANCE

Legislation enacted by the Maryland General Assembly at its regular session in 1964 made the first major revision in the basic State Aid to Education program since 1921. Because of this there was a considerable increase in State Aid to Education as the new aid formula became effective. The State Share of Current Expense increased from approximately 30 percent in fiscal 1964 to 36 percent in fiscal 1965. State aid for the minimum program increased by $28,000,000. The new program defines a foundation program of $340 per pupil to be shared by the State and the local units. The elements of the $340 program include a basic salary scale minimum staffing level and an amount for "other current expense" costs. The local unit share is based on a measure of wealth which includes real property and net taxable ordinary income. Those units with a relatively large measure of wealth are guaranteed $98 per pupil in State aid under this program. The State provides additional aid to those units which staff beyond the levels recommended in the minimum program. This incentive aid is provided in the same ratio as the State share of the foundation program. State aid for transportation is no longer a part of the minimum program but is funded by a separate appropriation. Approximately 97 percent of the total transportation cost in 1964-65 was at State expense.

SCHOOL LUNCH AND DIRECT DISTRIBUTION OF COMMODITIES

State-wide there was a 11.3 percent increase in participation in the School Lunch Program in 1964-65 over 1963-64. Only one local unit had a decrease; the other local units shared in the increase. The rate of reimbursement was reduced from 0.04 to 0.035 in April and to 0.03 for May and June with the average rate for the year 0.0384.

The Special Assistance Program (school lunch), on a pilot basis, was in effect in three schools in one local unit. This additional assistance (cash and commodities) enabled the school lunch program to be extended to approximately 225 additional children.

In-service training programs for school lunch personnel were continued with all twenty-four local units holding such programs during the school year.

In compliance with the National School Lunch Program regulations to assure adequacy of program operations, 323 administrative reviews of school lunch program operations in individual schools were completed in Maryland during the 1964-65 school year.

In the Special Milk Program there was a 1.2 percent increase in participation in 1964-65 over 1963-64.

The Maryland State Department of Education acting as a distributing agency of the U.S. Department of Agriculture, allocated Government-donated commodities to 941 public schools and 56 nonpublic schools which participated in the program. The total approximate value of food purchased by the U.S. Department of Agriculture for direct distribution to schools in the State of Maryland was $4,243,776.

Donated commodities and cash assistance for the Special Milk Program were also made available to all interested Head Start and academic programs sponsored in connection with the Office of Economic Opportunity's war on poverty and to one additional preschool program conducted by a local unit.

DRIVER EDUCATION

Maryland public schools were considerably above the national average for making courses available in driver education; however, student enrollment in these courses was slightly below the national average.

Frostburg and Salisbury State colleges approved offerings in driver education for both advanced undergraduate and graduate students. With these additions driver education courses are now available within reasonable commuting distance of all teaching personnel.

Without success, the Legislature actively pursued legislation requiring an approved driver education course for a person who applies for a driver's license before he reaches eighteen years of age.

PUPIL TRANSPORTATION

During the year, two additional State colleges, Frostburg and Salisbury, approved offerings in Pupil Transportation to be made available to advanced undergraduate and graduate students. These offerings, along with Towson State College and the University of Maryland, make courses available within commuting distance of all educational personnel within the State.

At the Adult Education Center, University of Maryland, a one-week's workshop was held for transportation supervisors in the local public school system of Maryland. The theme was "The Transportation Supervisor as the Coordinator for the School Bus Driver Instruction Program." The Coordinator for the workshop was Prof. Amos E. Neyhart, Director Emeritus, Institute of Public Safety, The Pennsylvania State University. As a result of this workshop, a manual is being developed containing specific guides for carrying out a pre-service instruction program for school bus drivers. A representative from each of the twenty-four local school systems participated in the workshop.

SCHOOL PLANT PLANNING

Construction continued at a rapid pace during the school year 1964-65, including totally new facilities, additions to existing facilities, and alterations and remodeling of existing buildings; total capital expenditures for school house construction completed and made available for use in the year amounted to almost $75,000,000. Construction contracts approved by the State Superintendent totaled 146 for the period.

Plans for new construction revealed a continued reduction in fenestration and increased provision for year-round environmental controls. Air conditioning plants were placed into operation in Anne Arundel and Frederick counties. Another continuing trend is the provision of flexibility for conversion of space to meet both current and future educational needs.

Planning for expansion and construction of junior colleges throughout the State continued at a rapid rate. Legislation provided additional funds for regional junior colleges and established fund distribution based on State participation in local operating costs.

The Area Vocational School Construction Loan of 1965 provided $10,000,000 in State funds to assist local units in the construction of area vocational facilities.

The General Assembly amended existing statutes to increase the amount of expenditures related to school construction, above which the State Superintendent's approval is required, from $300 to $5,000 and the maximum expenditures, allowed without formal bidding, from $1,000 to $5,000.

A State-wide fire code became effective requiring all school facilities to be designed and constructed in conformity with the Building Exits Code of the National Fire Prevention Association.

Five teams of local board members and educational administrators selected from several areas of the State made school

visitations outside of the State which were found to be very helpful.

Members of the State Department of Education, including the School Plant Section, acting as an advisory committee to the Howard County Board of Education, met jointly with members of the J. L. Rouse Co., developers of Columbia City, to plan for the educational program for this new community-city.

PERSONNEL

As of June 30, 1965, there were 263 employees in the State Department of Education, 130 in Headquarters, and 133 in Vocational Rehabilitation, including the two positions in the program for the Employment of the Handicapped. This number is an increase of 36 employees during the fiscal year.

DIVISION OF RESEARCH AND DEVELOPMENT

GENERAL

The fundamental purpose of the Division of Research and Development is the improvement of the public educational enterprise through the application of modern techniques in the collection, analysis, and utilization of experimental and operational statistics and information. The Division provides services for and works cooperatively with the other divisions of the State Department of Education, the local school systems, the University of Maryland, the Federal Government, professional associations, and other interested organizations and individuals. Services include assistance in defining areas of investigation, identifying relevant data, designing appropriate data-gathering instruments and procedures, processing raw data, analyzing and interpreting processed data, formulating inferences, and developing operational conclusions. On the basis of these conclusions, existing practices may be evaluated and programs for educational improvements may be implemented. The Division maintains a bank of basic educational data which may be drawn upon in connection with these services. The specific services performed by the Division depend upon the special needs of the recipients as well as the resources of the Division. Title X of the National Defense Education Act provides matching funds to assist in the improvement of State statistical services. In 1964-65 $43,542 was available from the federal government for this purpose.

ADMINISTRATIVE RESEARCH AND STATISTICAL SECTION

During the year the staff assisted in the administration of the program to distribute State and federal aid to the local public school systems of Maryland. Included here are both the payment of State aid during the current school year and preparation of estimates for the State budget. Assistance was also given to local superintendents in providing estimates of State aid for local budgets.

This year was particularly significant since major revisions in the State-aid-to-education laws enacted by the Maryland General Asembly in 1964 were implemented. This meant that time was spent in explaining the changes to representatives of local school systems of Maryland as well as other interested persons. These changes in the State aid formula were the result of a long-range study conducted by the local school systems and this Department. This Division had considerable responsibility in helping to develop the changes in the State aid formula as well as in computing the numerous calculations which were made during the study.

The staff worked with members of the other divisions of the State Department of Education to provide information of a

recurring nature as well as to provide data for special projects, workshops, etc. Included were data covering subject offerings, enrollments, and class size of Maryland high schools; status of desegregation; school construction; library data for both school and community libraries; characteristics of teachers covering certification, preparation, experience, and turnover; school lunch and school milk programs; special education programs for handicapped children; higher education fact sheet; vocational education; and summer school programs.

Members of the Division participated in a series of meetings with the staff of the Division of Vocational Education to evaluate and develop further a data system making maximum use of automatic data processing. Later in the year Maryland was invited to participate in a seven-state project sponsored by the United States Office of Education to develop a model information system for vocational education.

A survey instrument was developed in cooperation with members of the Division of Instruction to provide information on class size and subject offerings in elementary schools. Designed to be processed by automatic data processing, this survey was completed by all of the public elementary schools in Maryland.

In April, 1965, a State committee, with Mr. Maxwell E. Burdette of Montgomery County as chairman, was appointed by the State Board of Education to study all items and forms used in the present system of pupil data. Changes made will include the redesigning of forms to provide for greater use of automatic data processing and the development of a handbook to implement Handbook V, Pupil Accounting for Local and State School Systems.

Special attention is being given to the uses to be made of the information. To assist the main committee, subcommittees are working in the areas of pupil dropouts, follow-up of graduates, pupil transportation, health, special education, and techniques for pupil accounting.

A representative of the Division served on a State committee on administrative and supervisory salaries in the local school systems of Maryland. Meeting monthly, the committee in its report recommended changes in the kinds of positions and salary schedules supported by State funds.

Recurring and special requests from the United States Office of Education and National Education Association were handled by this Division. These included regular questionnaires from these groups, concerning enrollment, staff, school construction, and financial data. In addition, extensive data were provided for the biennial survey from the U.S. Office of Education, and biennial salary data from the N.E.A. The Division also processed

requests from the Maryland school systems, Maryland State Teachers Association, other state departments of education, graduate students and the general public.

Information was provided to other departments of Maryland State government. The staff worked very closely with the State Fiscal Research Bureau in the preparation of data for the Legislative Council before and during the sessions of the 1965 Maryland General Assembly.

The statistical portions of the Annual Report of the State Board of Education were prepared by this Division. Most of the preparation of the report for the printers was also the responsibility of this Division.

The staff participated in State, regional, and national conferences related to the improvement and development of statistical and research functions affecting education at local, State, and federal levels. These included meetings of:

American Association of School Administrators
American Educational Data Systems
American Association of School Business Officials
Association for Supervision and Curriculum Development
Committee on Educational Data System
Northeast States Council for Educational Research and Statistics
Southern States Council on Educational Research and Statistics

AUTOMATIC DATA PROCESSING SECTION

Ongoing services to the various divisions of the Department and other elements of the educational community were provided by the ADP Section during 1964-65. In addition the following new applications and projects were cooperatively undertaken:

1. A system was developed to produce a report on the Maryland secondary school teachers who are teaching out of their field of certification. This report will provide annually better information on the assignment of secondary school teachers.
2. Information from a State-wide elementary school staffing and organization survey was processed.
3. A directory of nonconventional school building designs and noteworthy facilities in the State was developed in cooperation with the superintendents. This document was designed to provide annually useful information for local and State school plant planners.
4. The preparation of monthly statements of appropriations, expenditures, and encumbrances of the Department for accounting and administrative purposes was initiated.
5. The collecting and reporting of information about State-aided handicapped children was converted to a punch-card system.

6. The Division represented by the Systems Analyst, offered consultant services and funds to Calvert, Charles, and St. Mary's counties to assist in the installation of their regional data processing center. This center will offer many benefits to the three school systems and will ultimately provide the State Department of Education with educational data of high quality in readily usable form.

INSTRUCTION RESEARCH SECTION

During 1964-65, the final development and field testing of forms for the Survey of Educational Practices in Maryland Public Schools was completed. The printing, distribution, and collection of the forms were accomplished preparatory to review and editing for data processing.

The Supervisor of Instruction (Research), working cooperatively with the Advisory Council for High Education and the Council for High School-College Relations, developed the questionnaire and assisted with the pilot-testing and administration of the Survey of Post-High School Planning of Seniors in Maryland Schools.

The Division continued to provide staff coordination services and financial assistance to the Maryland IRCOPPS project (Interprofessional Research Commission on Pupil Personnel Services) based at the University of Maryland.

The Supervisor of Instruction (Research) and the Systems Analyst continued to assist Mrs. Rozelle Miller, Supervisor of Special Education in the Division of Instruction and Chief Investigator, in the activities of the Maryland Educational Research Project focused on educational programming for seriously emotionally handicapped children in the Anne Arundel County schools.

Using the services of professionals from the Maryland public schools and a staff member from a State college on a part-time and summer employment basis, work continued on the abstracting of published educational research for publication and circulation in the Maryland educational community. The first issue in this series was published in the area of teaching effectiveness. The second issue on research on pupil personnel services will be distributed in the early summer of 1966.

EDUCATIONAL TELEVISION

Working closely with the State Educational Television Advisory Committee and the Maryland Council for Educational Television, the Division continued efforts to bring ETV to Maryland. Following numerous meetings, involving a committee of the State Board of Education, various technical consultants, rep-

resentatives of State agencies such as the Department of Budget and Procurement, the State Planning Department, and the Department of Public Improvements, the State Board of Education approved a plan for a State-wide network of ETV stations. Funds for the initial phase of the plan were included in the Governor's supplemental budget request to the 1965 Maryland General Assembly.

Without appropriate hearings by the Finance Committees of the Legislature, ETV funds were deleted from the budget and ETV was referred to the Legislative Council for study and a report to the 1966 Legislature.

Planning with numerous consultants and other activities to protect Maryland's interests in ETV continued, pending the start of hearings by the Legislative Council scheduled for July, 1965. Members of the State ETV Advisory Committee, the Maryland Council for ETV, and the Division continued to disseminate information and solicit public support for a State-wide ETV system through participation in the meetings of various organizations and through the use of the news media.

In June, 1965, following the petition of the State Board of Education to the Federal Communications Commission for UHF channels to accommodate the proposed ETV network, the Commission assigned to Maryland six channels which may be used for ETV purposes. These channels may be applied for by any nonprofit educational or community organization.

DIVISION OF VOCATIONAL REHABILITATION

HIGHLIGHTS OF THE YEAR

Vocational Rehabilitation in Maryland made significant advances in 1965, following the broad lines of increased services to disabled persons, staff development, expansion and improvement of rehabilitation program needs in Maryland, and the development of research and demonstration projects.

During fiscal 1965, 7,406 disabled citizens from every county and Baltimore City were provided with one or more services, an increase of 736 over the preceding year. The number of new referrals, 6,808, was an increase of 1,730 over fiscal 1964. Clients rehabilitated into gainful employment numbered 2,410, an increase of 436 over the previous year. The total caseload on the rolls of the Division was 12,705, an increase of 1,730 over the preceding year.

The State's program for the blind continued to expand. Sixty-eight blind persons were rehabilitated into a variety of jobs, including 6 medical transcribers who were employed in medical records departments in various hospitals. During the year, the number of blind persons employed as managers under the Randolph-Sheppard Vending Stand Program reached 26, with average monthly earnings of $701.

Vocational Rehabilitation units for the mentally ill and mentally retarded—as part of a Department of Mental Hygiene -State Department of Education cooperative program—were initiated, with the first such unit being activated in 1965 at the Crownsville State Hospital.

The National Advisory Council on Vocational Rehabilitation approved the request of the State of Maryland for a Research and Demonstration Grant to undertake the first comprehensive study of a total State vocational rehabilitation program by an outside research group, namely, the Bureau of Educational Research and Field Services of the University of Maryalnd.

The total cost of the Vocational Rehabilitation Program in Maryland in 1965 was $1,989,045, of which $1,198,294 came from federal funds and $790,751 State funds. The total expenditure was approximately one-third of the annual earnings of the 2,410 rehabilitants, which was $6,262,464.

GENERAL EXPANSION

While 1965 became the year of long-range planning and detailed studies of research and program development, of in-service staff training and case service review, and of persistent ground work on developing projects with mental health, correctional, special education, and other public and voluntary pro-

grams serving the disabled, again in 1965 there was increased accomplishment in a number of areas of the program of the Division of Vocational Rehabilitation.

Among the factors responsible for these expanded services were increases in case service funds available and the addition of ten new counseling positions. While new counselors could not be expected to produce effectively in their first year, their total contribution helped materially to increase the number of services provided.

In addition to the impetus given to the Vocational Rehabilitation program by the appropriation of additional case service funds and the creation of new counseling positions, there was another factor which contributed to the heightened morale and the resulting greater effort on the part of the staff. This was the creation of the Counselor III classification, which made it possible to give tangible recognition to career counselors with extensive service records.

Also, five part-time medical advisors were employed to serve various district professional staffs on matters pertaining to physical restoration. Heretofore a single State-wide medical consultant had been unable to provide adequate medical advisory services to the members of the district counseling staffs.

Through a Vocational Rehabilitation Administration grant, the Division was able to enlarge its in-service staff development program. A series of seminars conducted by specialists in various fields was held for both supervisory and counseling staffs. In addition, staff members who wished to pursue graduate courses in the universities in fields related to the performance of their duties were able to obtain financial assistance through this grant.

REHABILITATION OF THE MENTALLY HANDICAPPED

The greatest single expansion in the rehabilitation program during the year was in providing services for the mentally handicapped. The unit at Crownsville State Hospital, which was launched on July 1 in cooperation with the State Department of Mental Hygiene, developed a case load of over 1,000 persons and closed as rehabilitated the cases of 90 clients, this in spite of the fact it was a new program with four inexperienced counselors on the job.

Other developments following the new emphasis on services for the mentally handicapped included the complete ground work for a vocational rehabilitation unit at Rosewood State Hospital which was ready to begin operation on July 1, 1965, and the development of a program at Spring Grove State Hospital for the training of patients as nursing aides. In the first course of the Spring Grove program, 15 patients were trained, of whom

13 were placed in employment in the community within a month after completion of the training. These 15 clients had been patients in the hospital for periods varying from 1-9 years with a total of 57 years spent in the institution. Initial steps were taken also to establish at Spring Grove State Hospital a unit similar to that in operation at Crownsville State Hospital.

Also, in the area of work with the mentally retarded, the Division cooperated with organizations in Frederick County, with the aid of a Vocational Rehabilitation Administration grant, to establish the Jeanne Bussard Training Workshop in Frederick.

OTHER AREAS

Throughout the State there was progress in various other areas of the program. In Western Maryland, in addition to making an excellent record in increasing the number of rehabilitation closures per counselor and for the district, staff members cooperated with local boards of education, with the Maryland Correctional Institution, and with the various private agencies in developing plans for rehabilitation units and sheltered workshops. The Southern Maryland and Metropolitan Washington areas also increased materially the number of clients per counselor. Of special significance in this area was the outstanding accomplishment in the placement of mentally retarded clients in federal employment. For the second consecutive year the record of this district in this respect far surpassed that of any other area in the United States. In Montgomery County, cooperation with both the public schools and the Department of Health was facilitated by the assignment of a rehabilitation counselor on a part-time basis to each junior and senior high school and to each of the County health centers. This action resulted in a significant increase in referrals from these two sources. During this year also the concentrated effort toward the rehabilitation of the blind in Montgomery and Prince George's counties, which was begun earlier by the appointment of a special counselor, began to bear fruit.

In the Metropolitan Baltimore area, increased services were provided to several hospitals although insufficient professional staff rendered it impossible to do this to the extent needed. Members of the Metropolitan staff participated in the Community Health Fair sponsored by St. Agnes Hospital which attracted a large number of persons from within the Metropolitan area and provided an opportunity to publicize the services available to the disabled.

The Eastern Shore achieved the highest average in the State in the number of clients rehabilitated by each counselor. There was continued cooperation in this district with public schools, one of the most fruitful sources of referral. The employer advis-

ory groups, sponsored jointly by the Maryland State Employment Service and the Division of Vocational Rehabilitation in Cecil, Wicomico, and Worcester counties continued to be the instrumentality for the placement of numbers of handicapped workers.

DISABILITY DETERMINATION PROGRAM

In the Disability Determination Unit, the program activity increased 20 percent during the past year. Social Security forwarded 9,246 claims of various types, while State Agency action was completed in 9,041 cases. A backlog of 896 claims, or the equivalent of 1.1 month's work, remained on hand. New claims constituted 68.5 percent of the work load, divided between 5,915 disabled adults and 418 disabled child applicants. Reconsideration of previously denied claims was requested by 890 persons. Social Security forwarded 948 claims for investigation to determine whether periods of disability should continue. Other case receipts covered a wide variety of requests for clarification development such as that initiated by other states, Social Security Hearing Examiners, the Appeals Council, and by reviewing authorities in Social Security's Division of Disability Operations. From these claims 475 were selected for referral to Vocational Rehabilitation as potential clients. The Social Security Administration reported 11,735 residents of Maryland were receiving benefits monthly in the amount of $1,061,827. The economic significance of Social Security payments to disabled workers is obvious.

Another development in the Disability Determination Program was an innovation to achieve more objective evaluation of impairments. In the evaluation of cardiovascular impairment, a beginning was made in having the impaired individual demonstrate physical function by walking, stair climbing, and carrying weights as a feature of the examination. This has been defined as a physical activity assessment. The findings of the assessment are related to work activity level definitions commonly used by the Maryland State Employment Service. When indicated, this may be carried one step further with analysis by a vocational expert who considers functional limitation and personal assets to recommend specific jobs within an individual's range of employability. These refinements may have some implication for the general Vocational Rehabilitation Program.

Other Disability Determination Program activities initiated in the past year include scheduled training periods for Social Security District Office personnel in the more sophisticated aspects of documenting disability claims by State Agency instructors. Conversely, arrangements were made for the training of Disability Determination personnel by Social Security staff mem-

bers in the legal and technical aspects of Social Security. Although the adjudication of disability claims is highly specialized, changing medical procedures, legal interpretations, and the technical problems require constant adjustment in evaluation techniques which minimizes any routine.

* Beginning with 1964-65, total State, federal and local funds will not equal total expenditures due to net balance.
† Teachers' Retirement System not established in 1923 and 1928; Social Security payments are included beginning 1957.
‡ Excludes current expenditures for capital outlay which is included with current expenditures.
NOTE: Time series for part "Including Teachers' Retirement and Social Security for Teachers Paid Direct by State" corrected to exclude State retirement money for related expense fund and agencies other than public schools as previously reported.

* Half-time kindergarten pupils, where applicable, are expressed in full-time equivalents in arriving at per pupil costs.

† Beginning year ending June 30, 1957 Social Security payments by State for teachers are included in Total State—Including Retirement and Social Security. Local unit data do not reflect Teachers' Retirement or Social Security payment by State.

NOTE: This TABLE has been changed to reflect full-time equivalents of kindergarten for years shown; also corrected to exclude State retirement money for related expense fund and agencies other than public schools as previously reported.

* Provides $279 per pupil to support a basic minimum salary schedule of $4,800 to $7,000 at a staffing ratio of 45 teachers per 1,000 pupils, $61 for other current expenses, and $30 for increased enrollment. Effective 1965, support for allowed transportation costs is provided under a separate program.
† 1.228% times local base.
‡ Adjusted as provided by Article 77, paragraph 220 (b) (6).

* Calendar year unit, 1964.
† Not State-aided. Included in population served by county libraries; therefore, omitted from total. This figure for Takoma Park is that of the 1960 census.
‡ Not State-aided. Crisfield and Princess Anne did not report for this year.
a State payments based on old formula.
b Does not include pamphlets, pictures and periodicals.
c Estimated population from Maryland State Department of Health.
d Excluded from State total. Amount represents income from Caroline and Kent counties for shared operating expenses.
e Excluded from State total. Amount represents contract fees paid to Center by local units.
Amount for other expenditures ($22,250) excluded from State total. Reported as expenditures by local units.

INDEX

A

Academic course, each high school, 284-291
Accreditation and Certification, division of, 58-64
Administration
  Cost per pupil, 204
  Expenditures, 272-273, 279
  Per cent for, 198-201
  Superintendents, 2, 7-22, 248
Administration and finance, division of, 74-77
Adult Education
  Expenditures, 225, 227, 244, 274
  General, 228-229
  Vocational, 230-233
Agriculture
  Adult Education, 225, 230-233
  Enrollment, 135, 146
    Each high school, 292-299
  Federal aid, 225-226, 234
  School offering, 160, 292-299
  Teachers, 160
Aid from State and/or Federal funds (see State aid and Federal aid)
Aid per classroom, 244, 262
Aid per pupil, 244, 262
Appropriations
  Local, 195-197, 220, 264
  State, 195-197, 244, 262, 264
  Federal, 195-197, 244, 263, 264
Area Redevelopment Act, 224, 244, 263
Art
  Enrollment, 135, 158
    Each high school, 292-299
  Schools offering, 160, 292-299
  Teachers, 160
Assessable basis, 218, 221-223
Attendance
  Average daily, 247
  Per cent of, 247
  Teachers at summer school and workshops, 169
  Workers (see Pupil personnel)

B

Bands, orchestras, chorus, 156-157
Belonging, average number, 247
  Per teacher and principal, 161
Births, resident, 100
Board of Education, State, 2
Bonded indebtedness, 218-219
Books and instructional materials, 274-275
Boys and girls
  Each high school, 284-291
  Graduates, high school, 116-134
  Nonpromotions in first grade, 115
  Number of different pupils, 246
Budget
  Appropriations, State Department of Education, 244
  Local appropriations, 220
Buildings (see Capital outlay)
Business education
  Adult, 228-229
  Enrollment, 135, 152-153, 228-229
    Each high school, 292-299
  Schools offering, 160, 292-299
  Teachers, 160

C

Capital outlay, school, 195, 216, 220, 272, 282
  By site, building, equipment, 282
Certificate status, teachers, 174-176
Chorus, bands, orchestras, 156-157

C—(continued)

Certification and accreditation, division of, 58-64
Civil Defense adult education, 224, 229, 263
Clerks, 248-251
Colleges
  Community and junior college enrollments, 235
  Graduates qualifying for teaching certificates, 168
  High school graduates of 1963 entering, 126-134
  State, 126-131
Commercial course, each high school, 284-291 (see also Business education)
Community colleges, 198-199, 235, 262
Community services, 198-199, 273, 281
Contents, table of, 23
Contracted services, expenditures, 274-286
Cost per pupil, 202-203
  By function, 204
  Transported, 210
Costs (see Expenditures)
County superintendents, directors, supervisors, 7-22
Courses in individual high schools, 284-291
Crippled children, services for, 101-109, 111
Current expenses
  Amount and per cent by source, 195-197
  Cost per pupil, 202-203
  Per cent distribution by function, 198-201

D

Dates, opening and closing of schools, 89
Days in session, 89
Debt services, 195, 218-220, 272, 283
Departments of education, State and local, 2-22
Disbursements (see Expenditures)
Distributive education, 151, 225-226, 230-234
Driver education and training, high school
  Enrollment, 135, 159
    Each high school, 292-299
  Schools offering, 160
  State aid, 244, 262
  Teachers, 160

E

Elementary schools
  Disbursements for instruction, 275
  Instructional personnel, 250
  Number of, 91, 245
Emergency certificates, 174-176
Employment of high school graduates, 117-120, 123-125
English, high school
  Enrollment, 135-137
    Each high school, 292-299
  Schools offering, 160, 292-299
  Teachers, 160
Enrollment
  Adult, 228-232
  Campus schools, State colleges, 94, 96
  Elementary, 90-99, 246, 252-261
  Grade or year, 92, 94-99
  Handicapped children, 101-109, 111
  High school, 90-91, 246, 252-261
    Course, each school, 284-291
    Grade, 92, 94-99
      Each school, 284-291
    Subjects, 135-159
      Each school, 292-299
Nonpublic, private and parochial, 90-91, 94, 97-99, 252-261

E—(continued)

Public, 90-95, 246
Subject, 135-159
Each school, 292-299
Summary, 90-91, 94
Equalization fund, 195-197, 244, 262
Equivalence high school, 194
Evening schools and courses
Enrollment, 228-232
Expenditures, 225-227, 274
Expenditures
(see also Administration, Capital outlay, Community colleges, Community services, Debt service, Fixed charges, Food services, Health services, Instruction, Maintenance, Operation, Pupil personnel, Student body activities, Transportation)
Adult education, 225, 227, 274
Contracted services, 274-280
Libraries, local, 240-241
Other charges, 274-280
Rehabilitation, 237, 242-244
Salaries, 274-280
Vocational, 225-226, 234
School library books, 274-275
Supplies and materials, 274-280
Textbooks, 274-275
Total, by major functions, 244, 272-273
Vocational, Federal, 225-226, 234
Experience of teachers, 177-188

F

Failures (see Nonpromotions)
Fall enrollment, 90, 92-99
Federal aid
Libraries, 240-241
Schools, 195-197, 224, 263
Vocational education, 224-226, 234
Administration and supervision, 225-226
Salaries of teachers, 225, 234
Financial statements
State department headquarters, 242-243
State public schools, 244, 262-283
Vocational Rehabilitation, 242-243
First grade nonpromotions, 115
Fixed charges, 198-201, 273, 279
Follow-up of graduates, 117-134
Food services, 198-199, 272-273, 280
French, adult, 228
French, high school
Enrollment, 135, 144
Each high school, 292-299
Schools offering, 160, 292-299
Teachers, 160

G

General course, each high school, 284-291
German, 145 (see French for other references)
Grade enrollment, 92, 94-99
Graduates
High school, 116-134
Entering State colleges, 284-291
From each school, 136-141
Occupations, 117-119, 123-125
Guidance, teachers of, 160, 248-251

H

Handicapped children
Expenditures, 102, 111, 244
Home and hospital instruction, 101-102, 108
Opportunities for education of, 101-111
Preschool, 111
